# OUR PORTFOLIO

We have worked with fresh ideas to build innovative products that are smart, intuitive, and unique.

# Honeywell

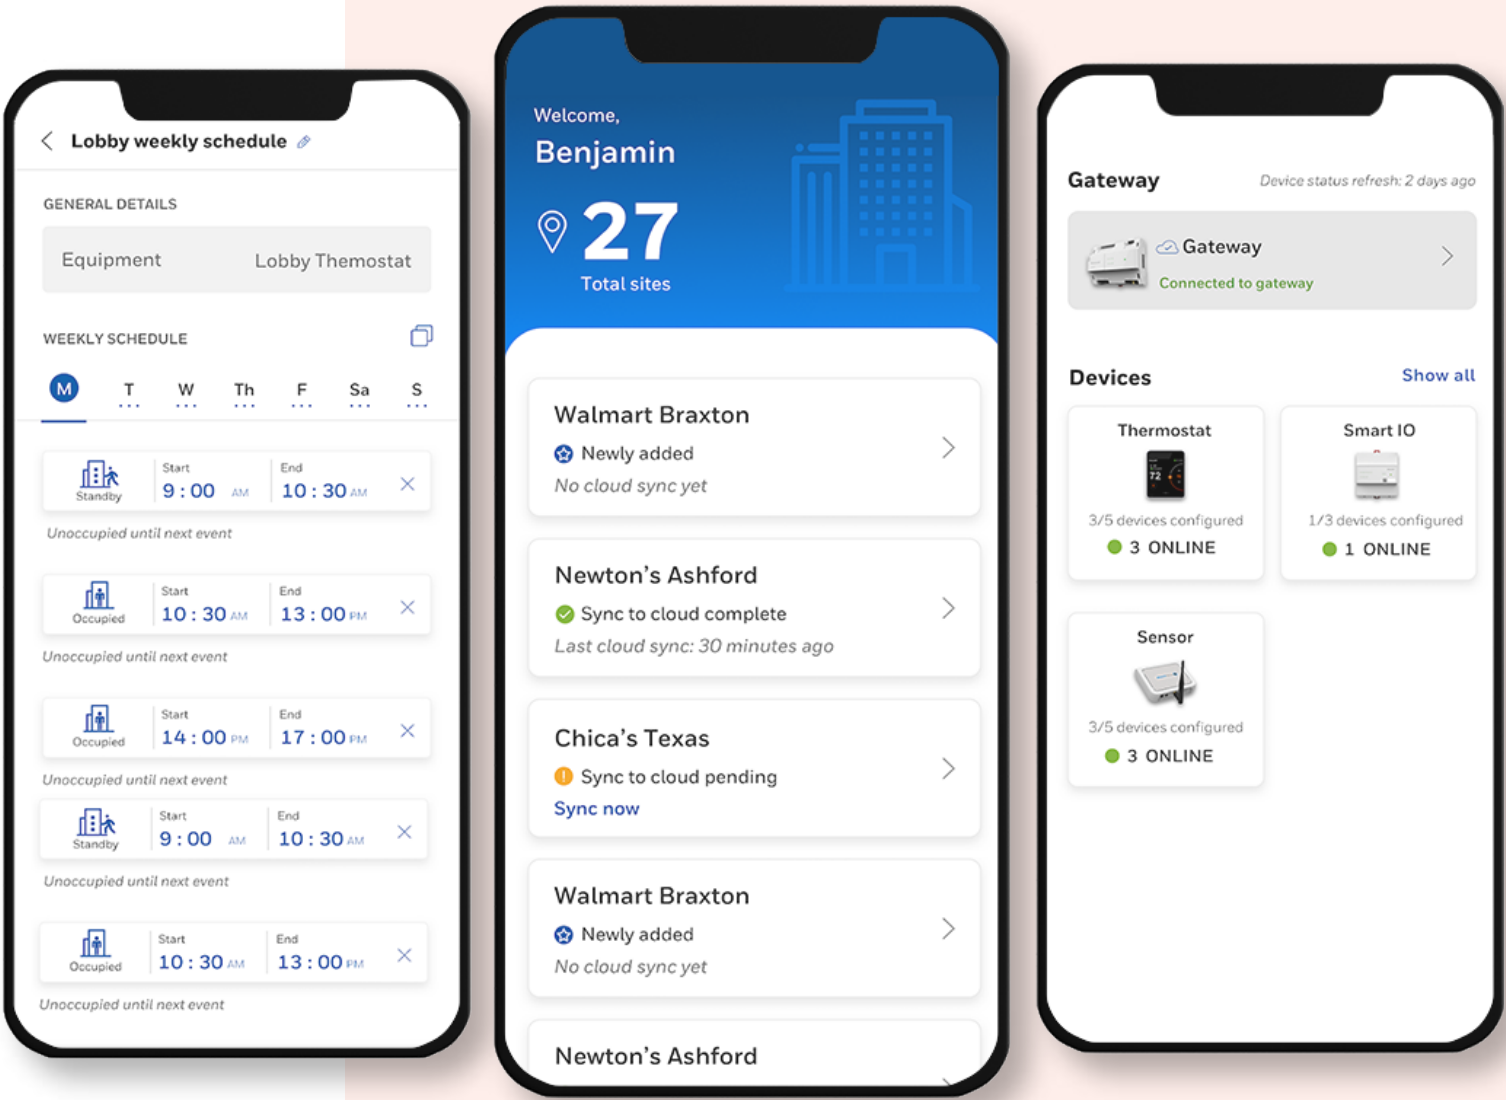

WebClues has developed a comprehensive app for Honeywell that provides an IoT solution for home and business automation. The app includes features to sign up, configure devices, integrate them with the gateway router, and set up notifications between devices for easy automation. The gateway router also provides notifications when sensors detect danger or events, ensuring a reliable automated safety system. WebClues has created a feature-rich and user-friendly app for Honeywell, providing customers with secure automation products for their homes and businesses.

## Technology

## Industry Services

## Platform Mobile App

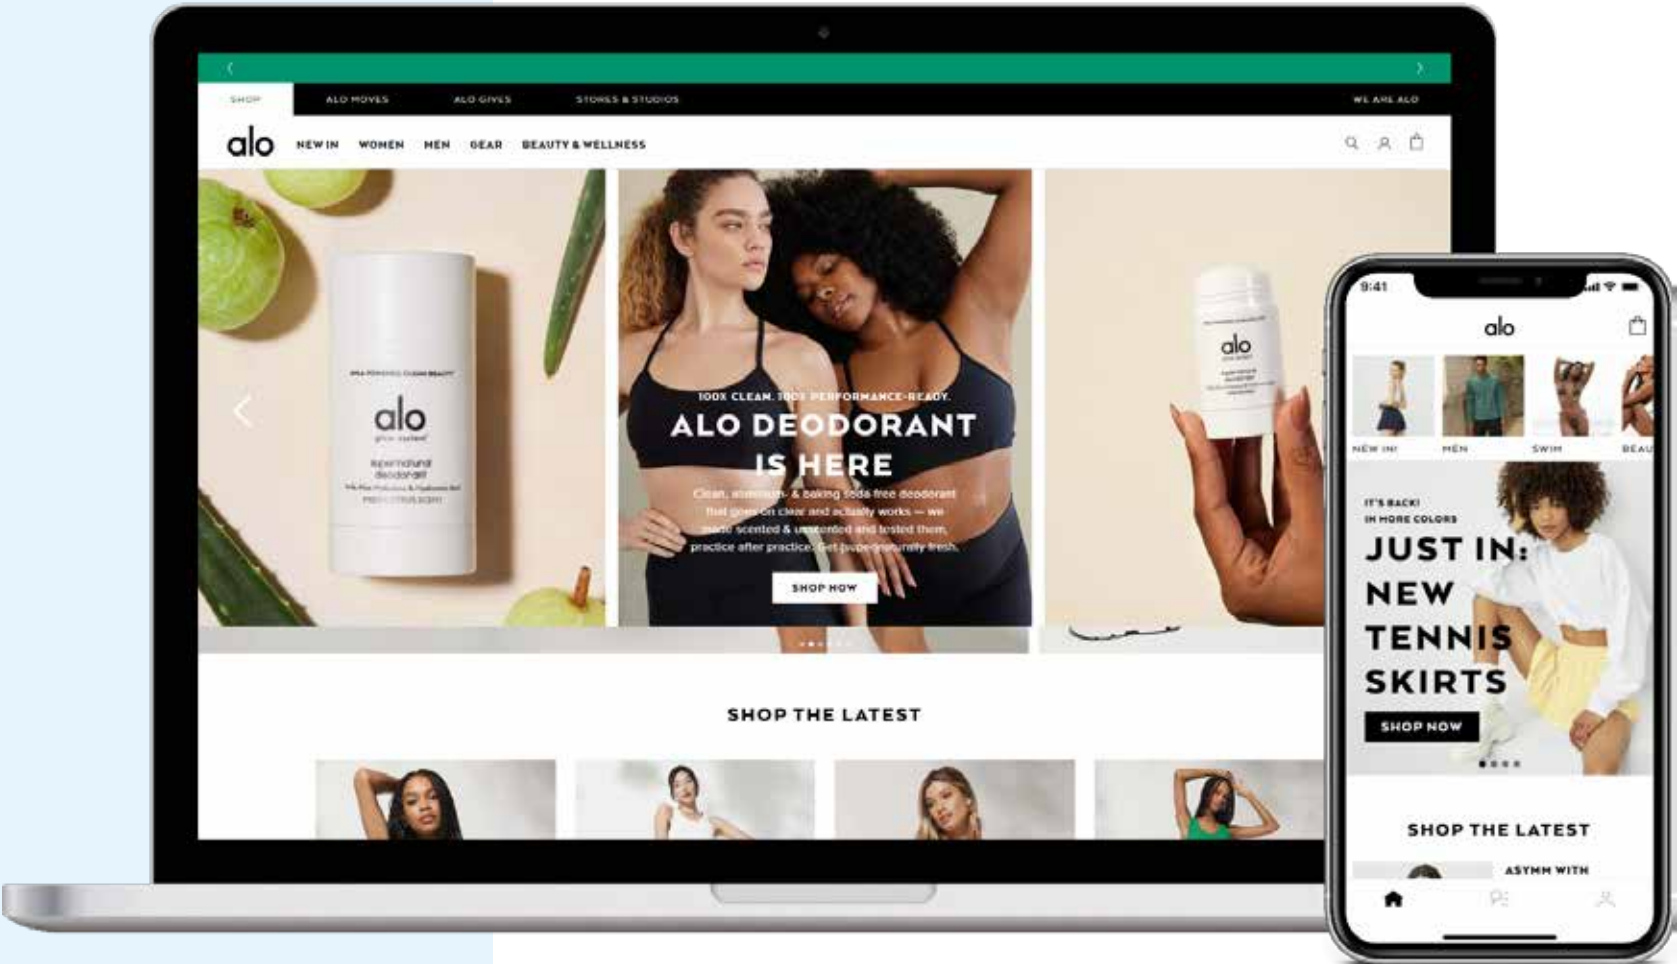

# Alo Yoga

**Industry**  
E-commerce

**Platform**  
Web App  
Mobile App

We have developed an exclusive online Brand Store for Alo Yoga, offering customers an intuitive and user-friendly interface for product exploration. Customers can view the category and details of the products with ease, as well as gain exclusive access to new products before they are available in physical stores. Moreover, customers can place orders, apply promo codes, and get the product delivered to their doorsteps with a secure payment gateway. WebClues has developed both the website & app with best-in-class features, ensuring a seamless shopping experience for the customers.

## Technology

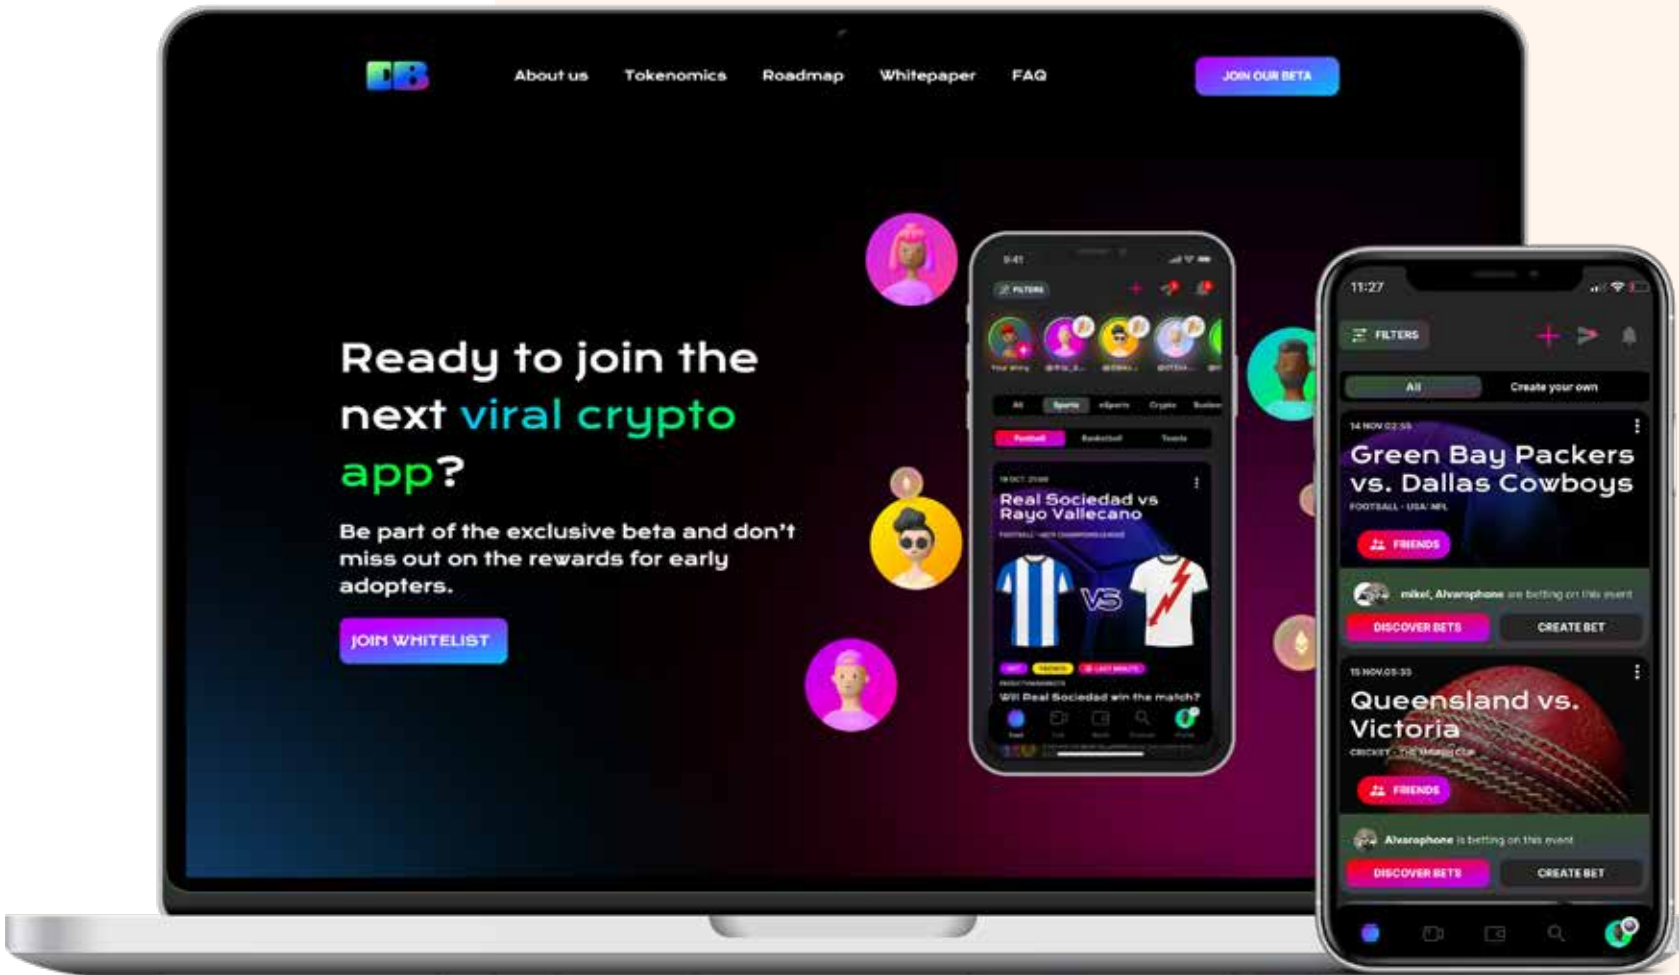

# DefiBet

**Industry**  
Online Gaming

**Platform**  
Web App  
Mobile App

Defibet.house is an innovative social betting platform that leverages AMM prediction market technologies, P2P unlimited betting and state of the art social UI features with the freedom and opportunities of Decentralized Finance.

## Technology

web 3.0

# Advance Mining

A BTC wallet was created for this project which helped efficiently manage crypto assets. We simplified the asset and mining management with added safety. The wallet automated the mining operations with total efficiency.

## Technology

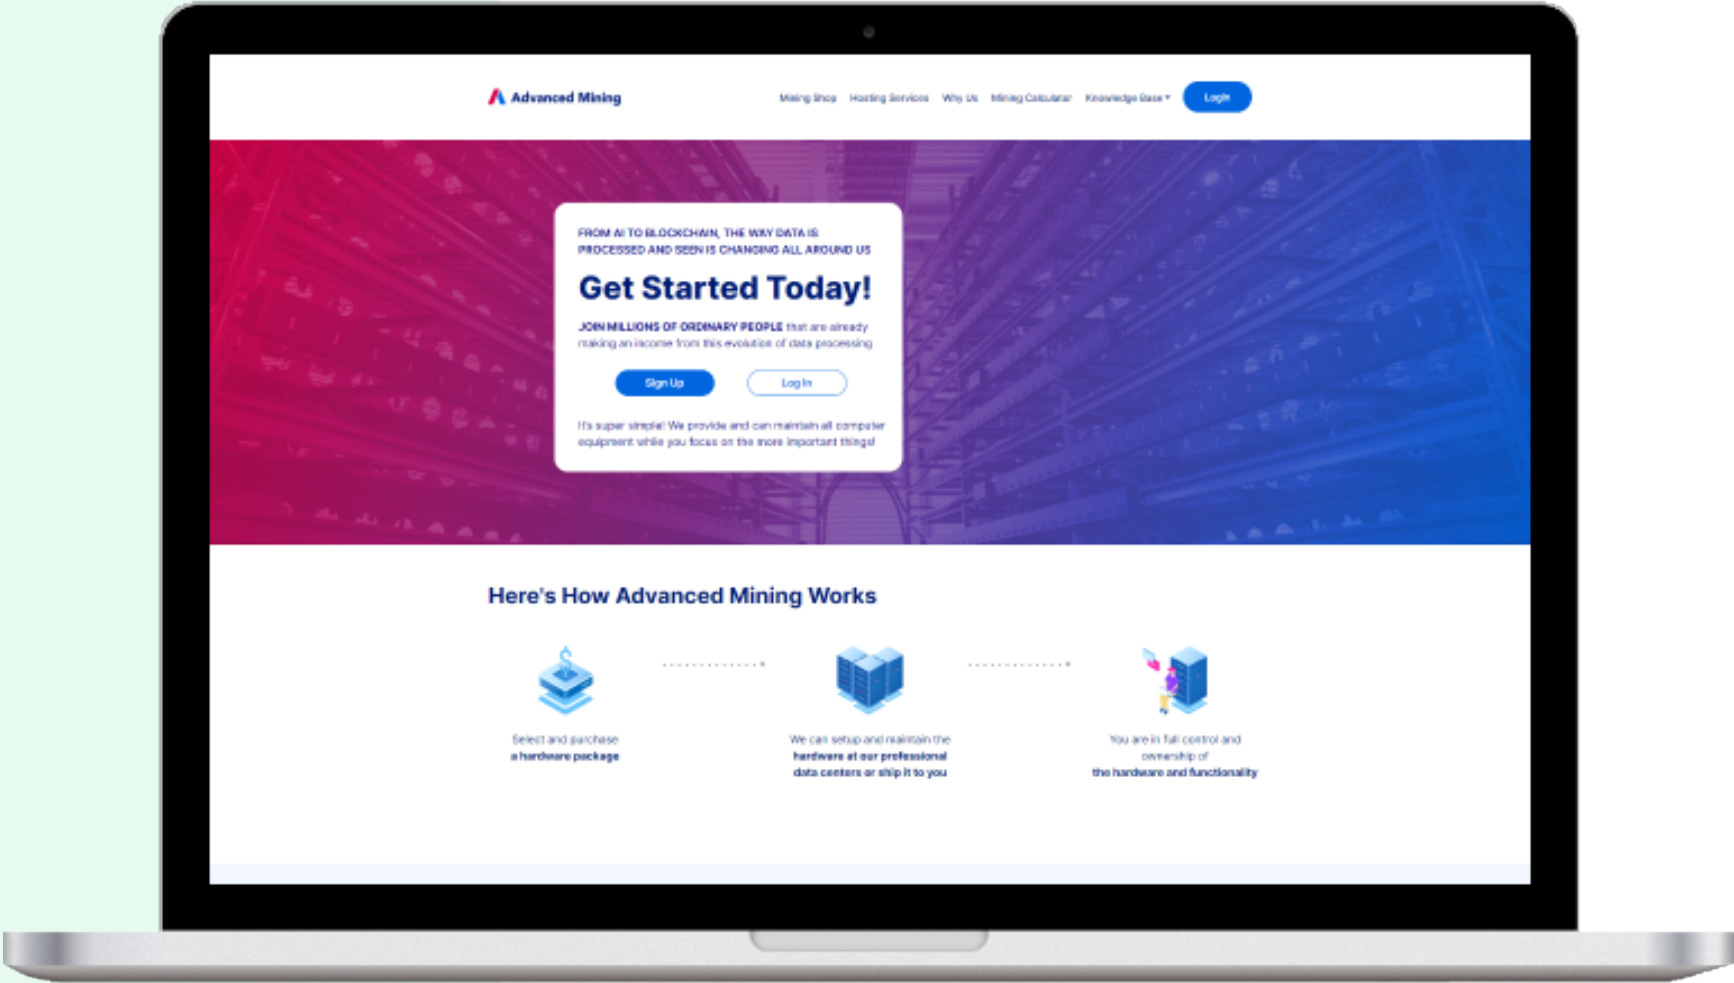

Industry  
Fintech

Platform  
Web App

# Zemaas

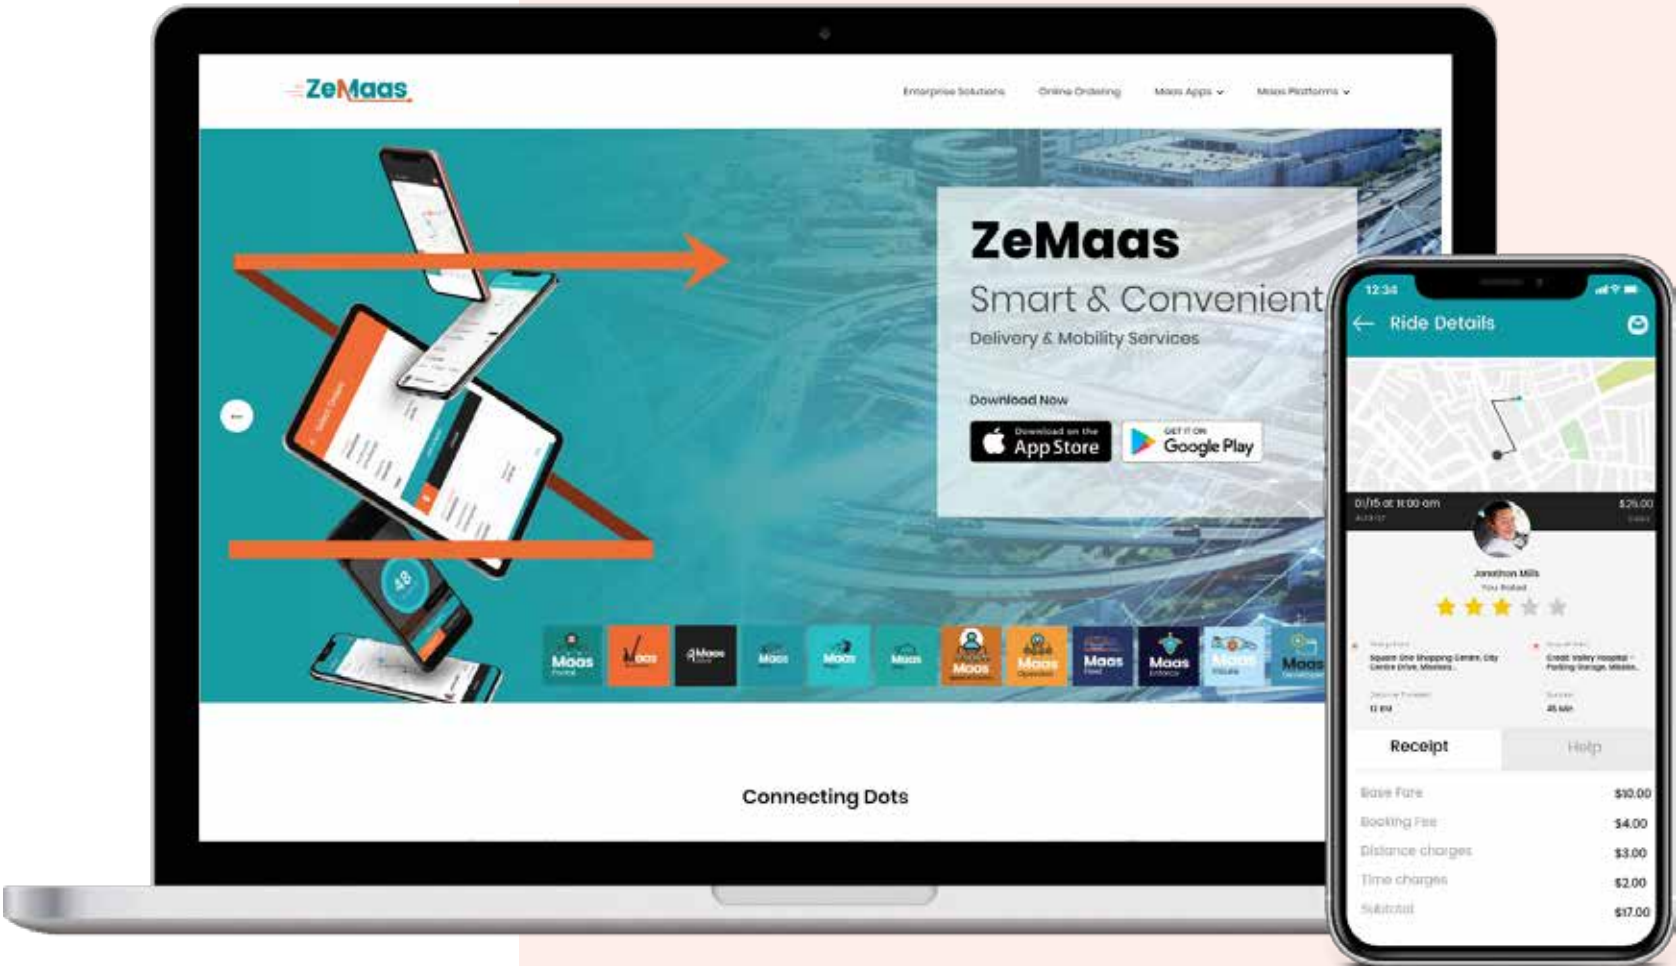

**Industry**  
Taxi and Food  
Delivery

**Platform**  
Web App  
Mobile App

We have developed multiple apps and a website for ZeMaas for its various services including mobility, food delivery, and logistics. The mobility platform allows users to book taxi rides, while drivers can register and accept rides. Users can mark favorite locations, give tips, and report any issues. Furthermore, the platform also offers a seamless food delivery experience for restaurant owners and customers, with the ability to register, manage online food orders, and track drivers in real time. We have also developed an extensive admin panel with detailed user and driver analytics, operator management, accounting, and more for all of its services.

## Technology

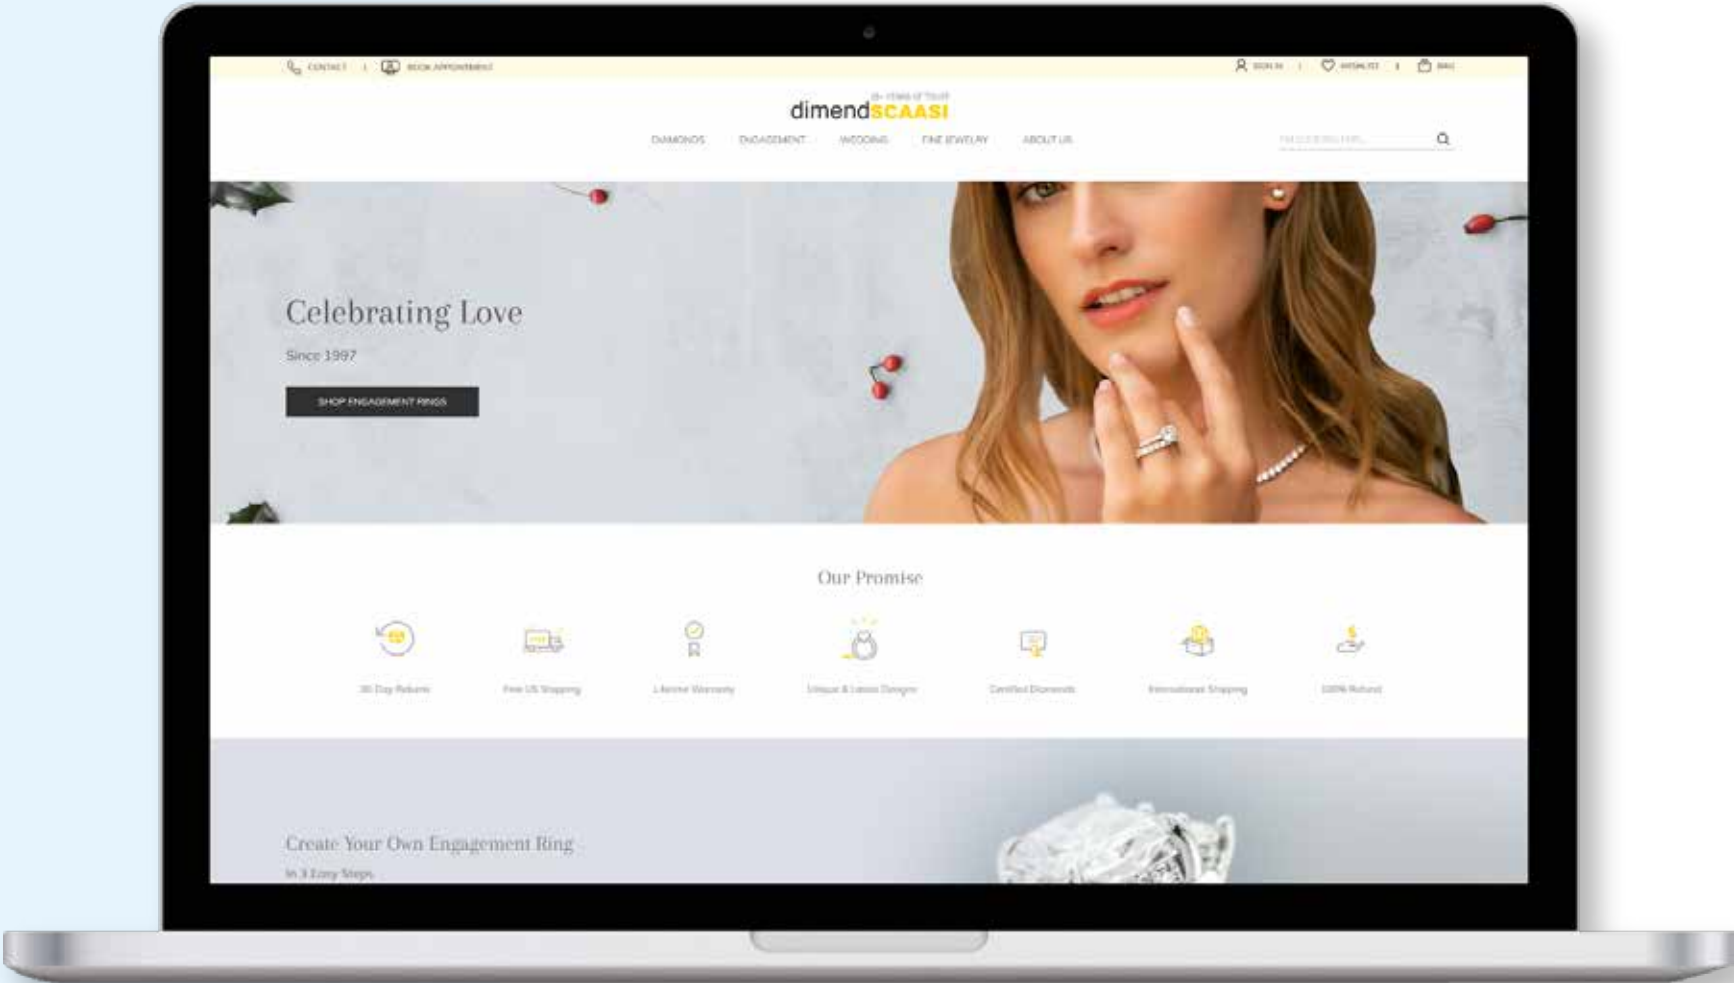

# Dimendscaasi Chicago

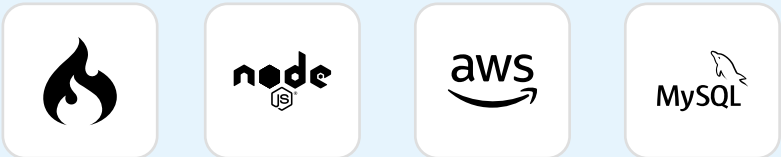

Industry  
E-commerce

Platform  
Web App

We have developed a professional online shopping solution for Dimendscaasi Chicago which offers an up-to-date inventory of diamonds imported from various third-party vendors. Customers can customize their ring of choice by selecting their preferred style, metal, and diamond, and previewing the ring before purchase. Customers can also book an appointment in-store for a consultation. Furthermore, customers can upload a photo of their hand to see how the ring will look on their fingers. These unique features have helped Dimendscaasi Chicago to increase customer engagement.

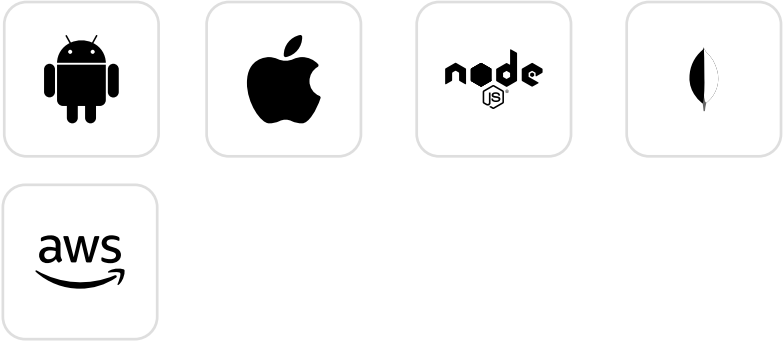

## Technology

# Dubai Calendar

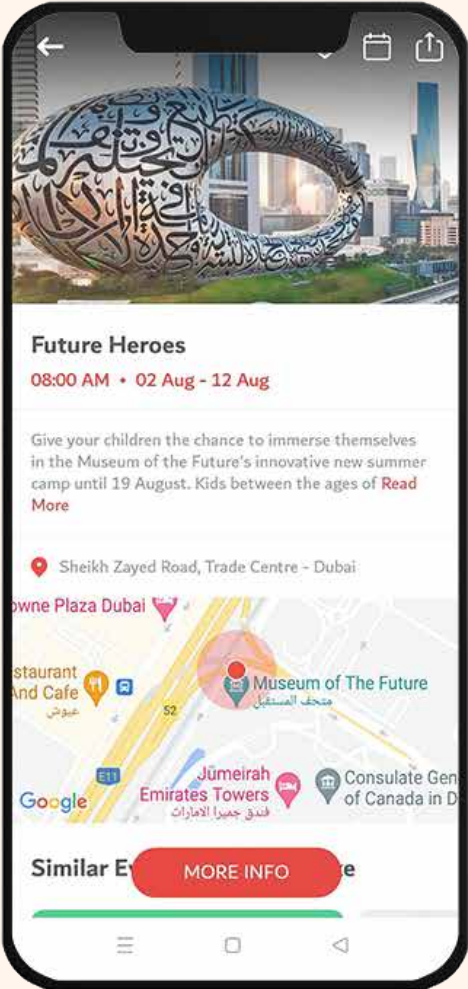

"We developed the Dubai Calendar app for the government, showcasing festivals, events, and exhibitions in the city. The app also displays the real-time number of visitors to Dubai. This was done with the help of an API integrated from the Dubai Tourism Department. Additionally, the app is regularly updated to keep up with the changing events in Dubai. The app is helping the Dubai tourism sector to increase its reach and maximize its revenue.

## Technology

Industry  
Events

Platform

# reBaked

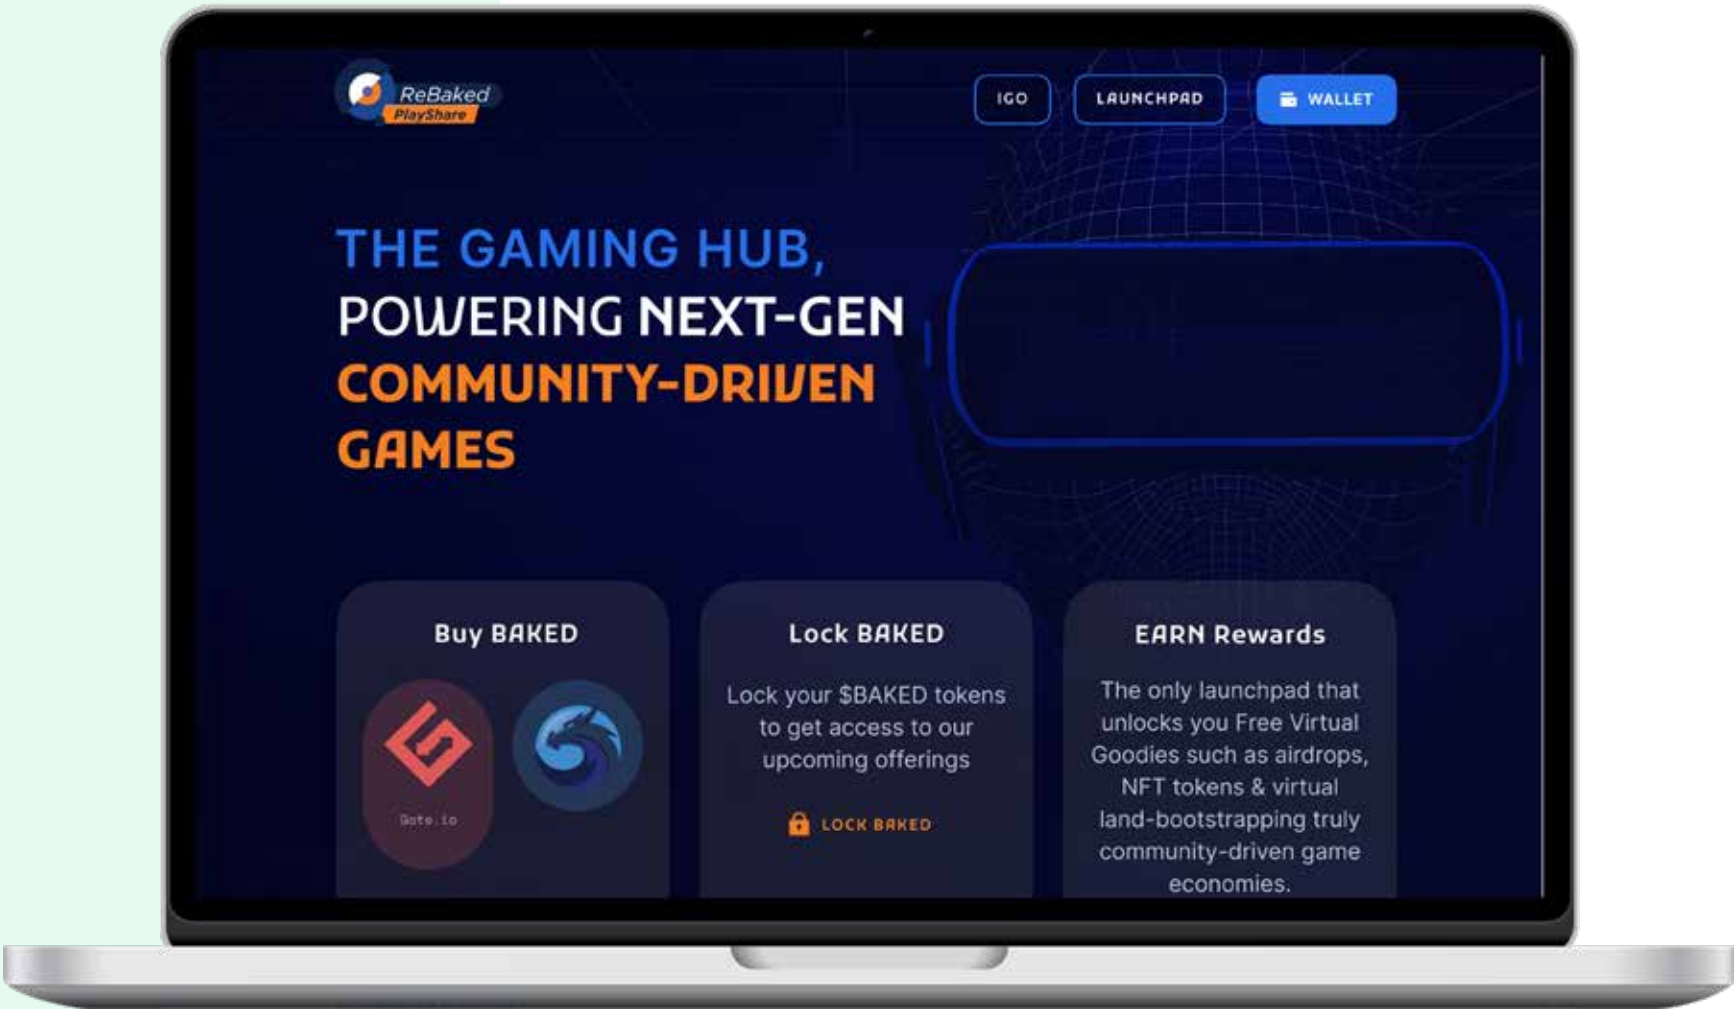

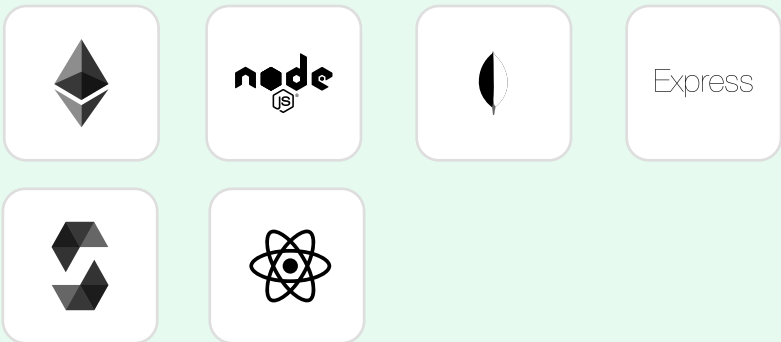

**Industry**  
Software  
Industry

**Platform**  
Web App

reBaked is a service marketplace where users can connect with other individuals and communities to collaborate on projects. Codezeros was involved in the scope documentation, design, and development of the frontend, backend and the smart contracts of the project.

## Technology

# The Fridge

**Industry**  
DeFi  
Launchpad

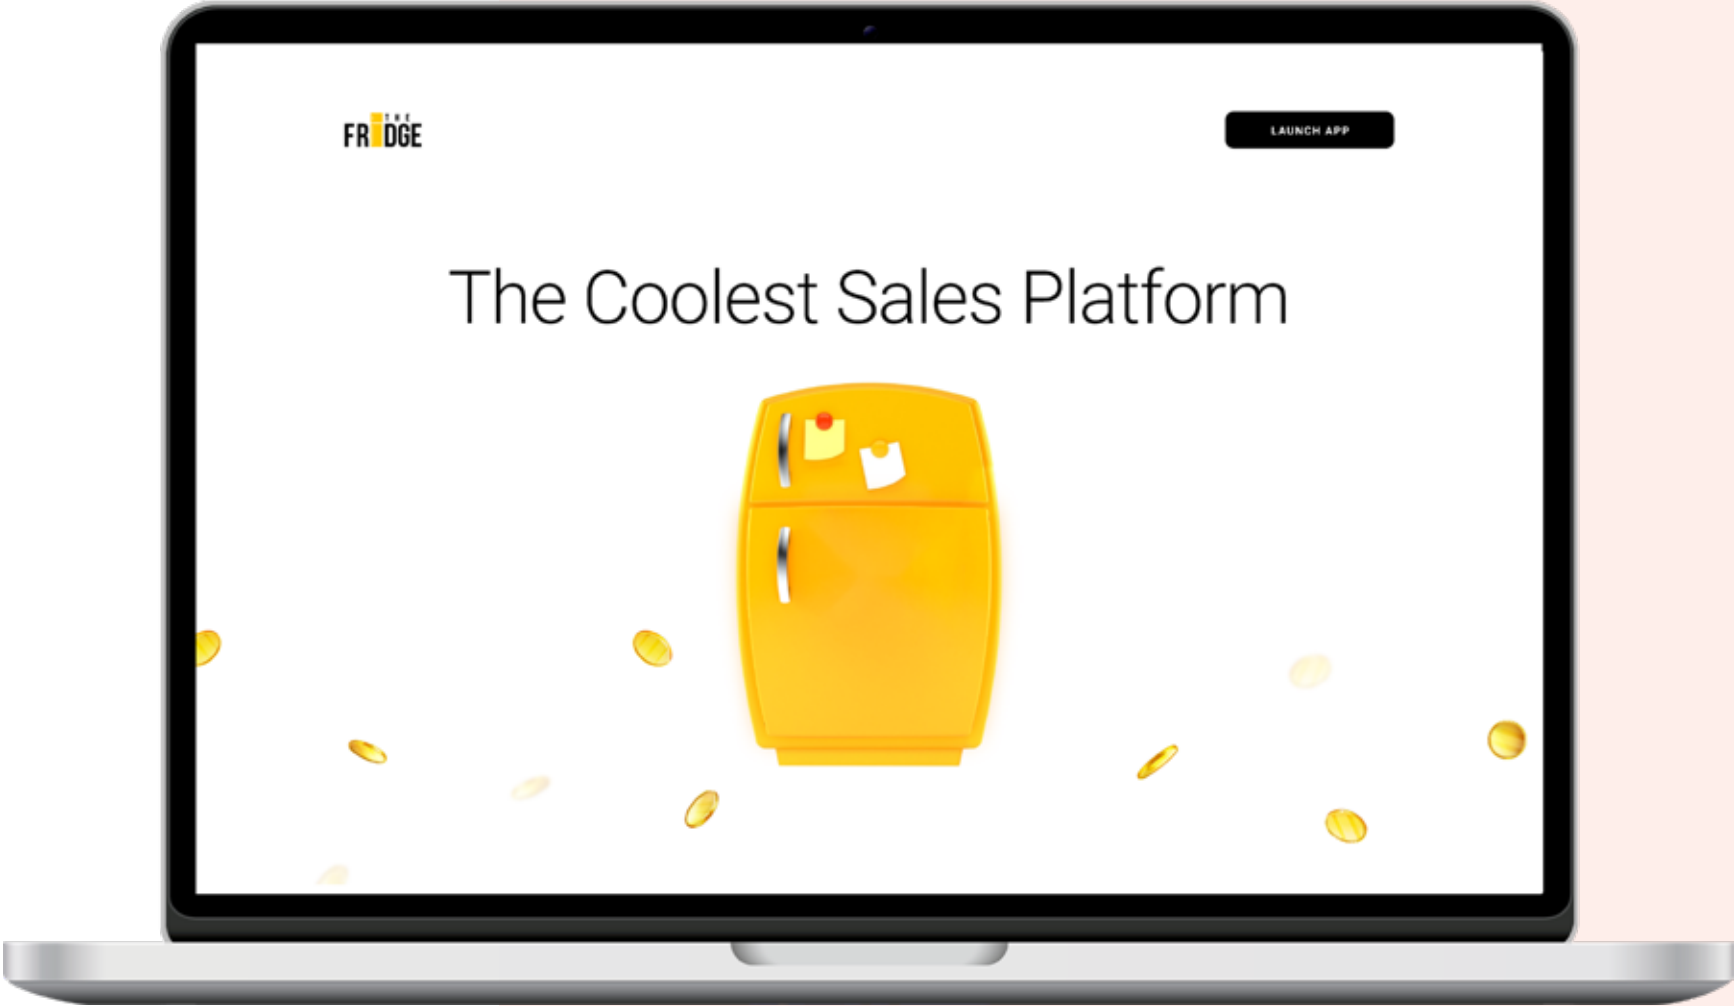

**Platform**  
Web App

We had the opportunity to develop a website for "Fridge Finance," a crypto launchpad website. The website helps in the listing of the token on sale as soon as the project is approved. Users can look at detailed information about the token sale including the project team, the use case for the token, and the token distribution plan. They can also participate in the token sale by purchasing tokens using a variety of cryptocurrencies or fiat currencies. Also, users can have access to the token sale dashboard to track the status of participation and view the token balance and transaction history.

# Aswaaq Online

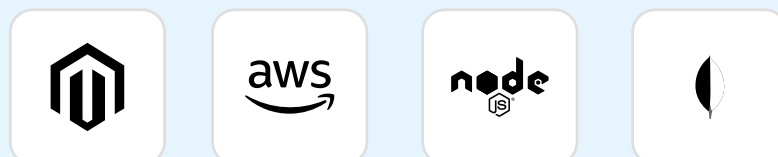

Industry  
E-commerce

Platform  
Web App

Aswaaq Online is a hypermarket website that allows users to order groceries online and have them delivered to their doorstep. Customers can sign up and link their Wafa ID to create an account that is synced with offline stores and can add items to their cart and place an order. The platform allows for both online and offline purchases, and customers can choose to pick up their order from a store at a specific time. The website also allows admins to run multiple promotions simultaneously and sync orders and customer data to the Microsoft D365 ERP system.

# Bundles Bets

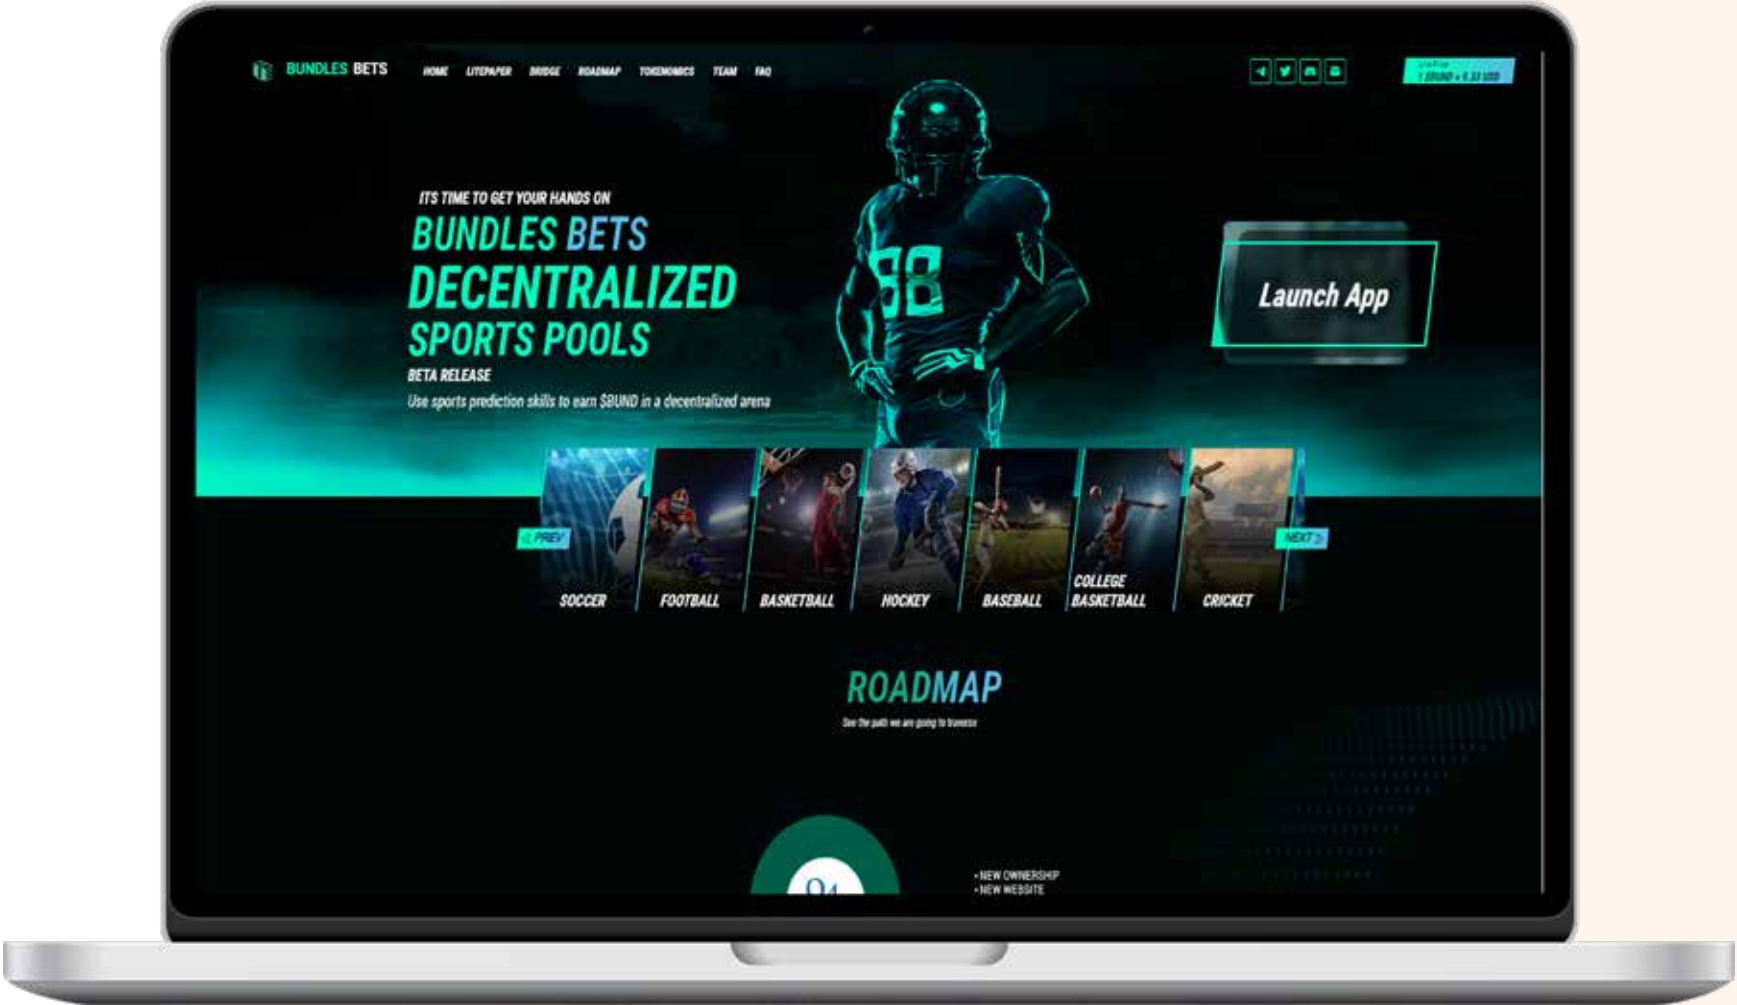

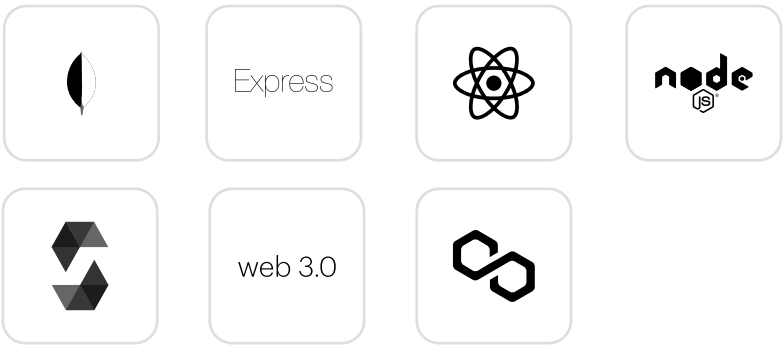

Industry  
DeFi

Platform  
Web App

A platform created for users to use their crypto prediction knowledge to earn APY and also provides a decentralised marketplace where users can buy selection of NFTs and where artists can launch their NFTs with utmost ease.

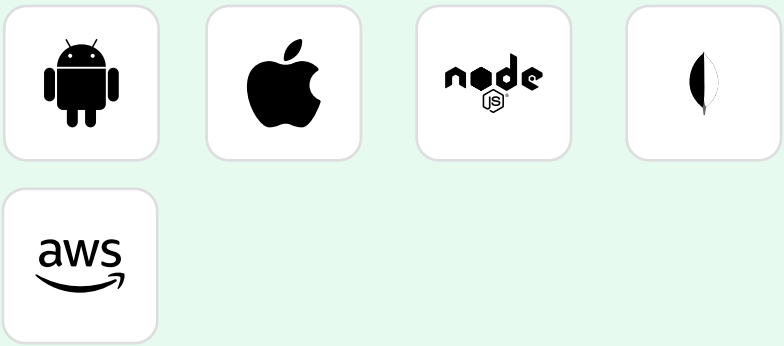

## Technology

# Indian Railways

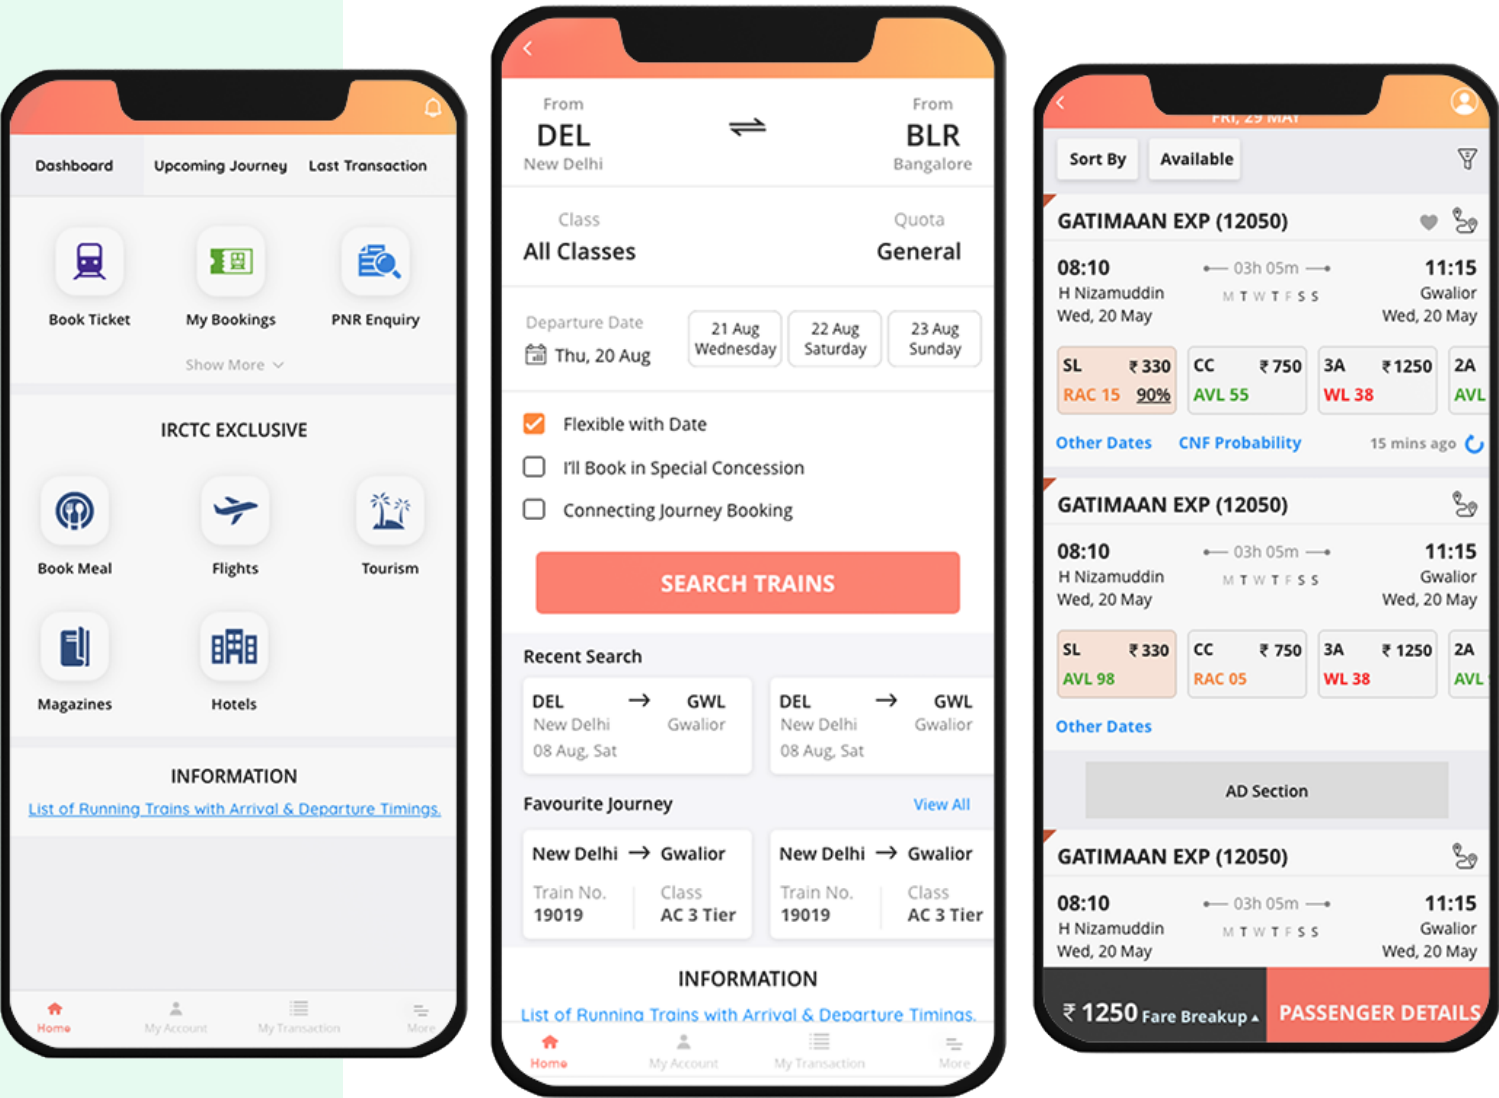

The Indian Railways app, developed by our team, has achieved over 1 million downloads and a 4.4 rating, providing users with an easy way to access train timetables, live location, and tracking of trains with just a few taps. The app also allows users to check their ticket status using their PNR, and search for trains between source and destination locations, making travel planning stress-free.

## Technology

Industry  
Travel

Platform  
Mobile App

# Unitychain

**Industry**  
Multiple Industry  
Intersection

**Platform**  
Web App

Creating a blockchain from scratch. We are creating our own consensus protocol. This blockchain will have various use cases included DIM (Decentralised Identity Management), Multicurrency development, Smart contract development and support and decentralised exchange.

## Technology

# Peugeot

Industry  
Automobile

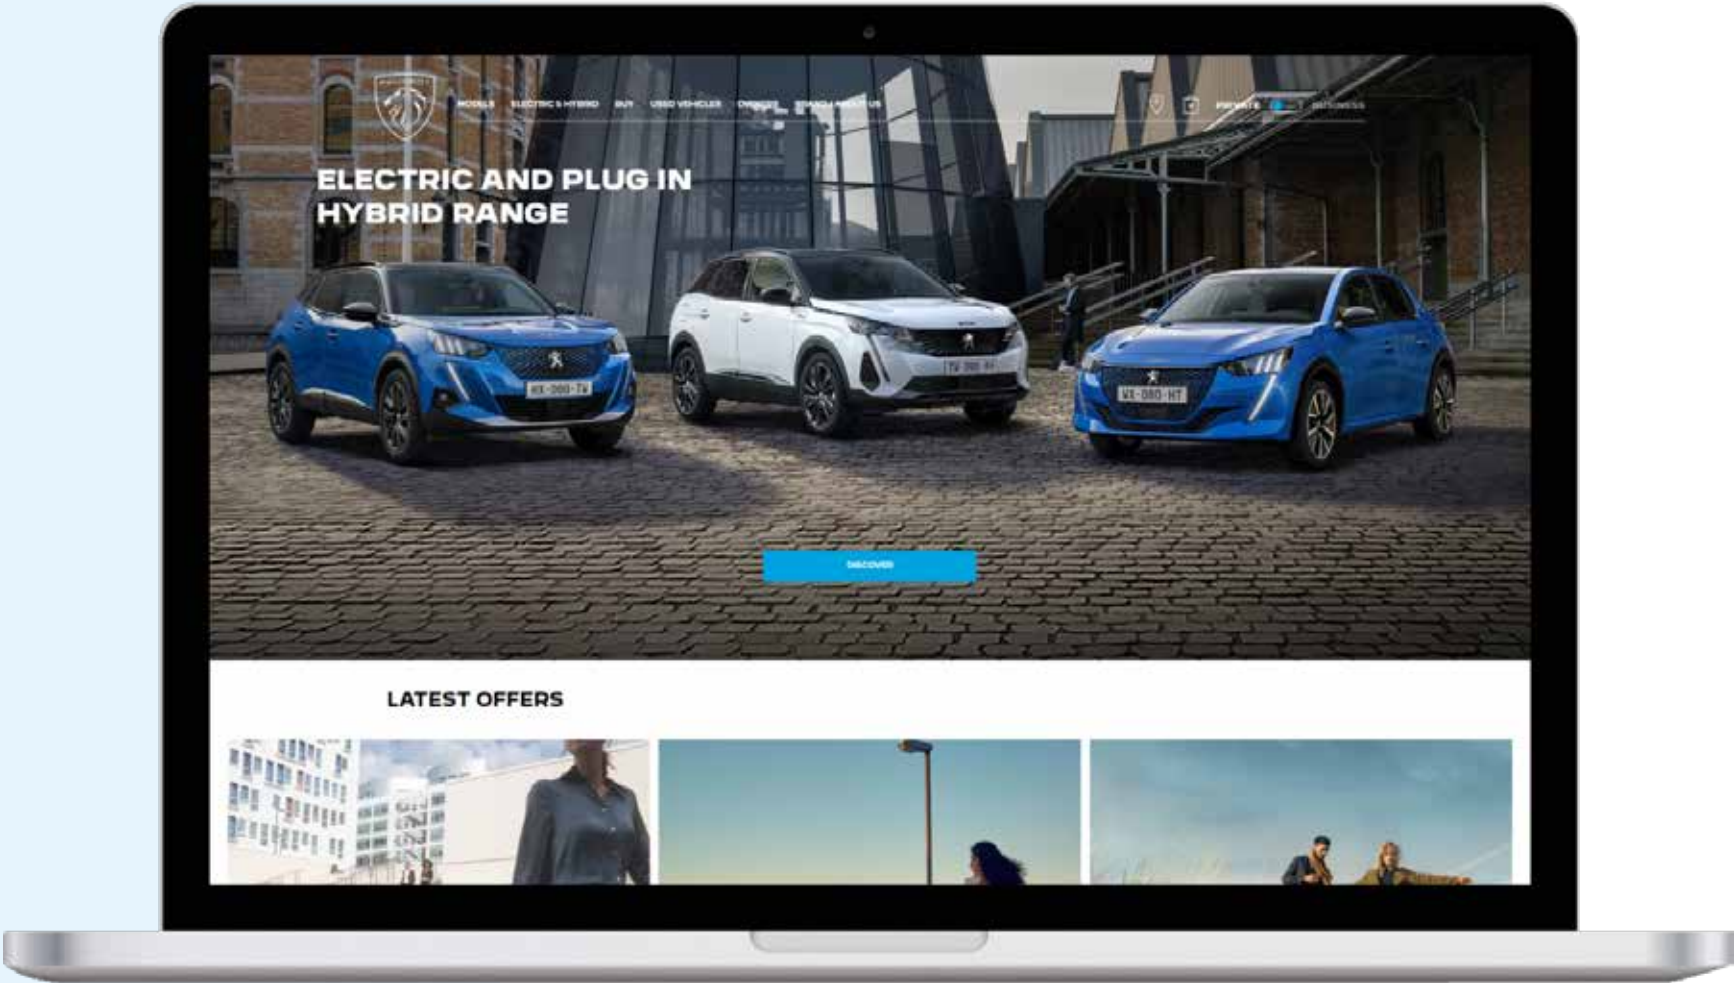

Platform  
Web App

We are excited to professionally share our expertise in developing a website for the acclaimed French automotive manufacturer, Peugeot. Working closely with their brand, we have crafted features & elements to display the company's range of cars, including specifications, colors, and 360-degree views. The website showcases all of its cars to customers in a specific country or region, allowing users to browse and explore cars based on their preferences. This gives them an in-depth look into the cars before making their purchase. Our team of experienced designers and developers has worked diligently to accurately reflect the brand's identity and bring its vision to life.

## Technology

[www.wdcstechnology.com](http://www.wdcstechnology.com)

# Voscreen

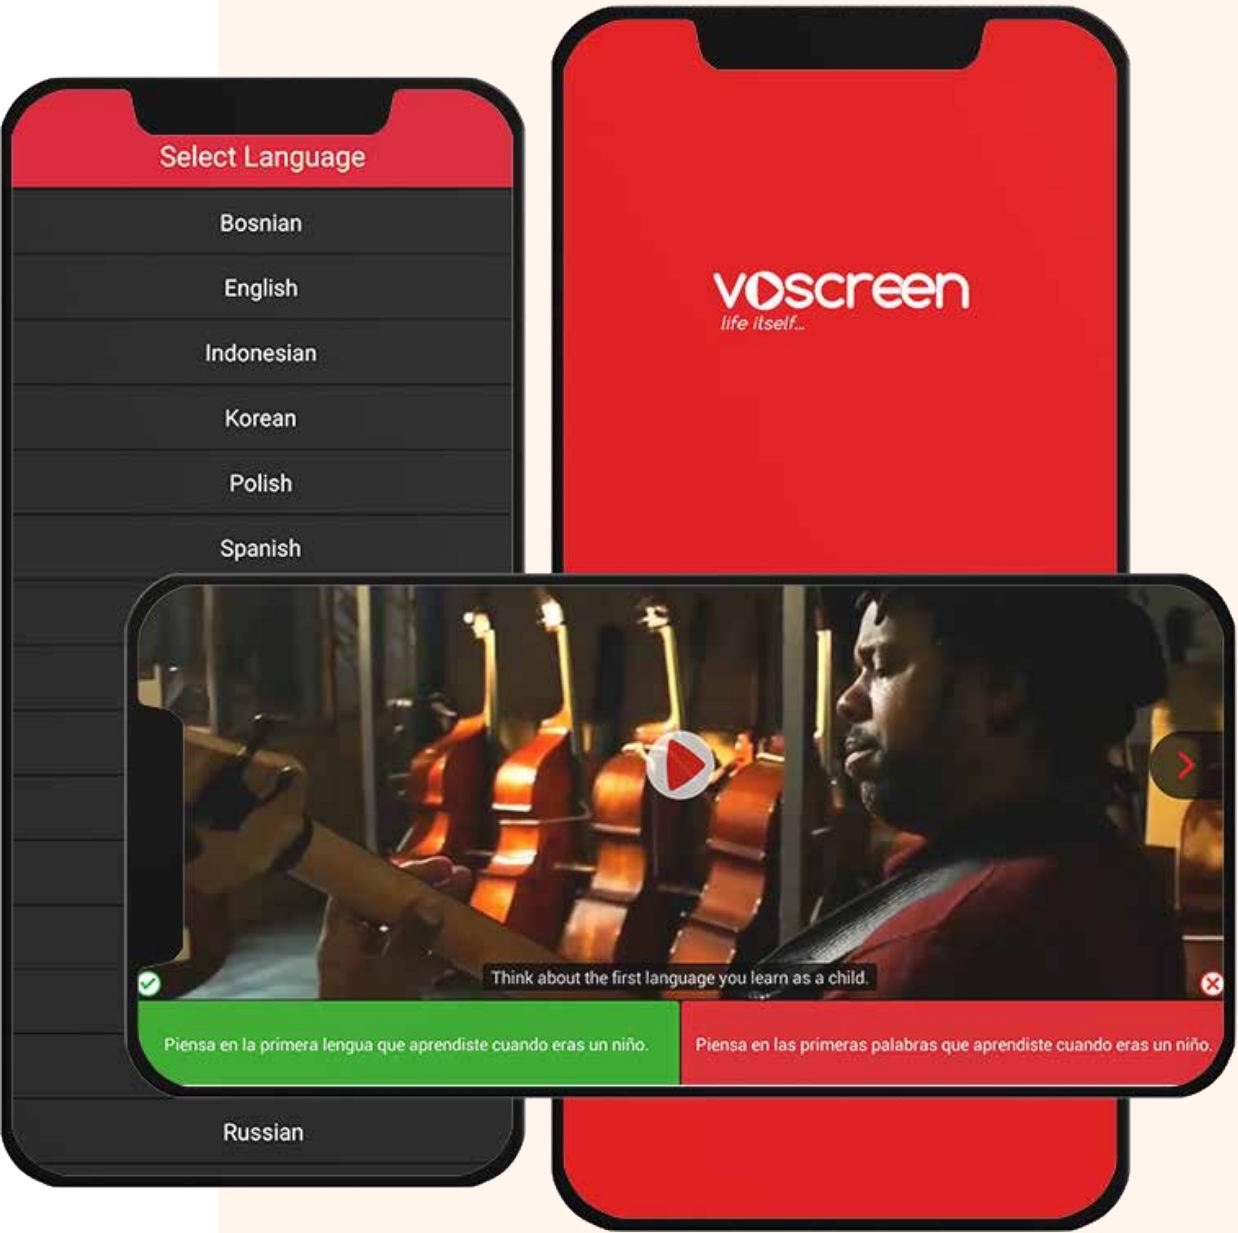

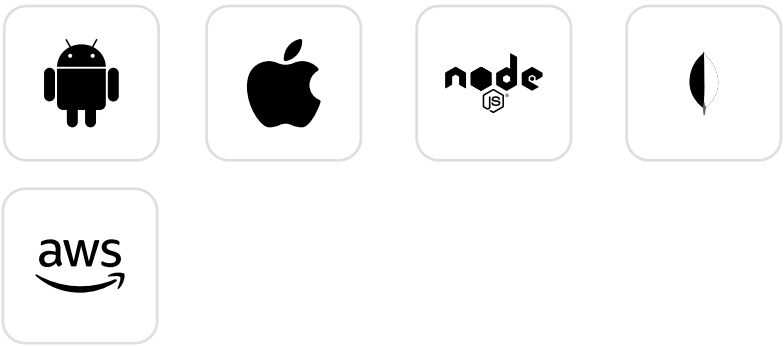

Industry  
Education

Platform  
Mobile App

VoScreen is a top-rated app for English language learning with over 1 million downloads and an average user rating of 4.4. It offers engaging lessons, interactive exercises, games, and readings. The app provides detailed explanations of vocabulary and grammar concepts, as well as quizzes and assessments to test students' knowledge and track progress. Users can ask questions, share resources, and receive support from other students and teachers. The app aims to provide an enriched learning experience and boost confidence in English studies.

## Technology

# Omnia Market

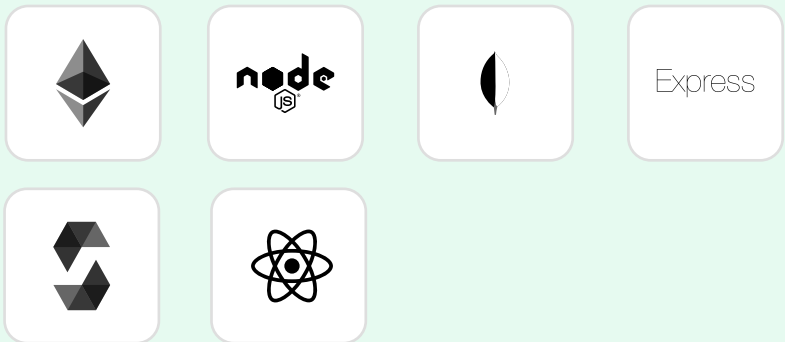

**Industry**  
Data  
Analytics

**Platform**  
Web App

Omnia Markets is a data analytics platform powered via blockchain. A data analytics platform on blockchain technology allowing the client to record and store data in a safe, secure, and transparent setting. This ensures that the users get the most recent and reliable information.

## Technology

# MrpMoney

Industry  
Finance

Platform  
Mobile App

As an authorized Financial Services and Credit Provider, Mr. Price Money offers customers a wallet filled with different payment types, allowing users to stay on-trend and on budget. The website provides 6 or 12-month store card offers and a lay-by facility that enables customers to access their favorite fashion, home, and sportswear when they want it. Additionally, it provides users with a recharge facility where one can recharge from a variety of mobile data plans, including prepaid and postpaid.

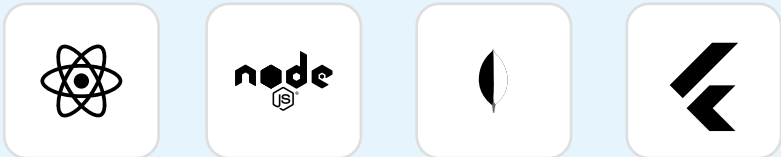

## Technology

# Klipsch Connect

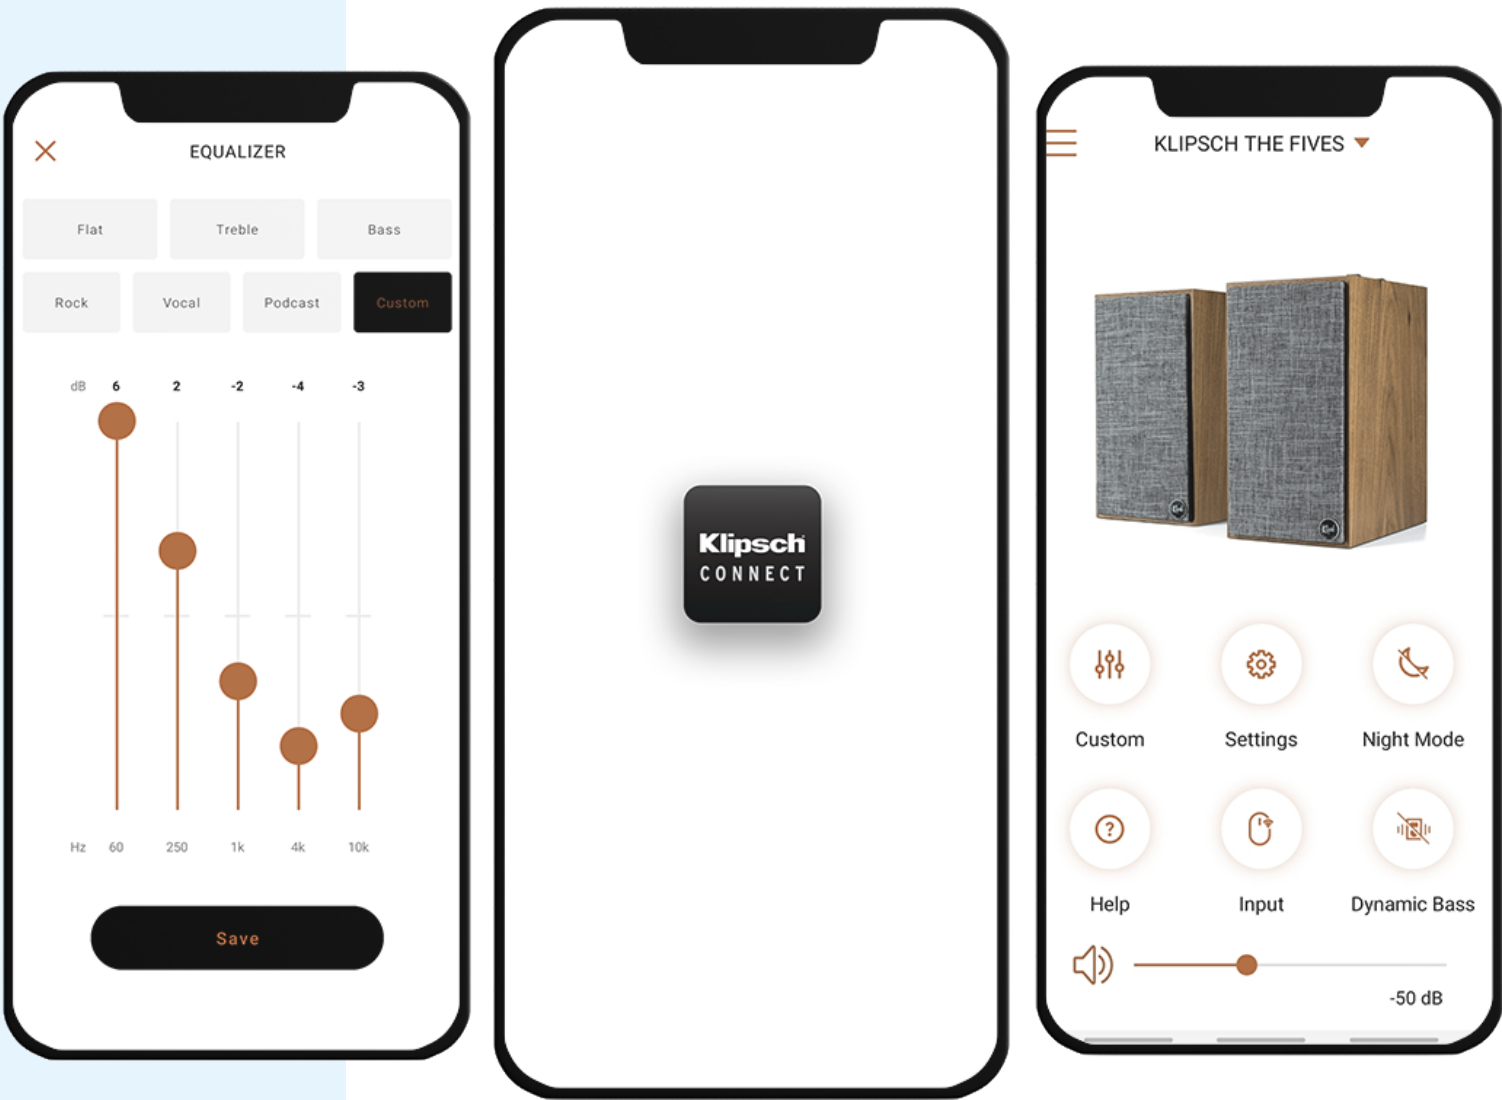

We developed the Klipsch Connect App to help Klipsch product users make optimum use of their Klipsch headphones or speakers through equalizers and sound effects. The Klipsch app is meant for Klipsch product owners wherein they can adjust the volume of the audio being played through their headphones. Different sound effects (bass, mid, treble) could be tuned to customize the sound of the audio being played. There are sound enhancement features, such as virtual surround sound, to improve the audio quality. The app further supports Bluetooth connectivity, allowing users to wirelessly connect their headphones to their devices.

## Technology

Industry  
Connectivity

Platform  
Mobile App

# Cryptex

**Industry**  
Cryptocurrency  
Trading  
Industry

**Platform**  
Web App

Cryptex offers TrueUSD based trading - the first verified asset-backed stablecoin that gives 1:1 parity with USD. It has features such as multiple currency wallet, spot trading, DDoS protection, lower transaction fees, 24x7 support, ultra-high performance, cold-storage multi signature wallets and advanced charting library to enable tracking of funds at all times.

## Technology

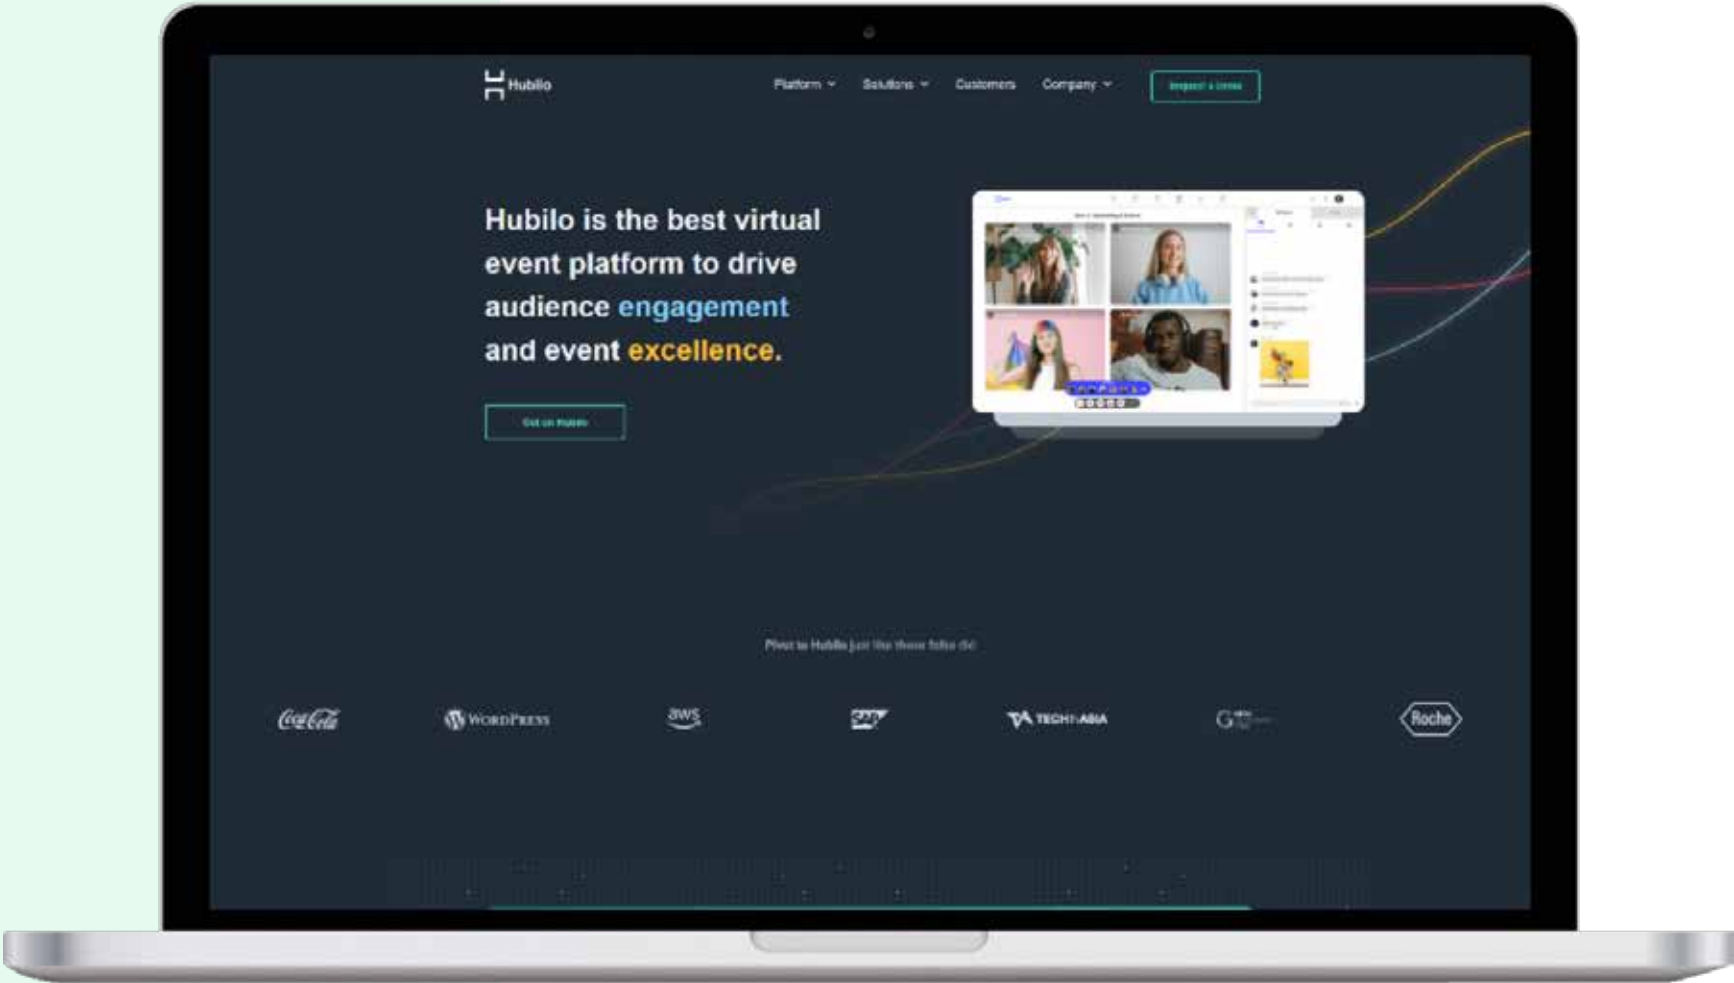

# Hubilo

**Industry**  
Virtual Event  
Platform

**Platform**  
Web App

This website offers a comprehensive platform for event organizers to manage their events and engage attendees. We have developed features to help event organizers view calendars of events that are scheduled to take place, and create detailed listings of events, including the date, time, location, ticket prices, and registration for events. With Hubilo, event organizers can also manage ticketing, seating charts, and attendee lists, making it a one-stop shop for event management. We believe that the website is the best resource for event organizers, and we are confident that it will help them make their events a success.

## Technology

# Skyloov

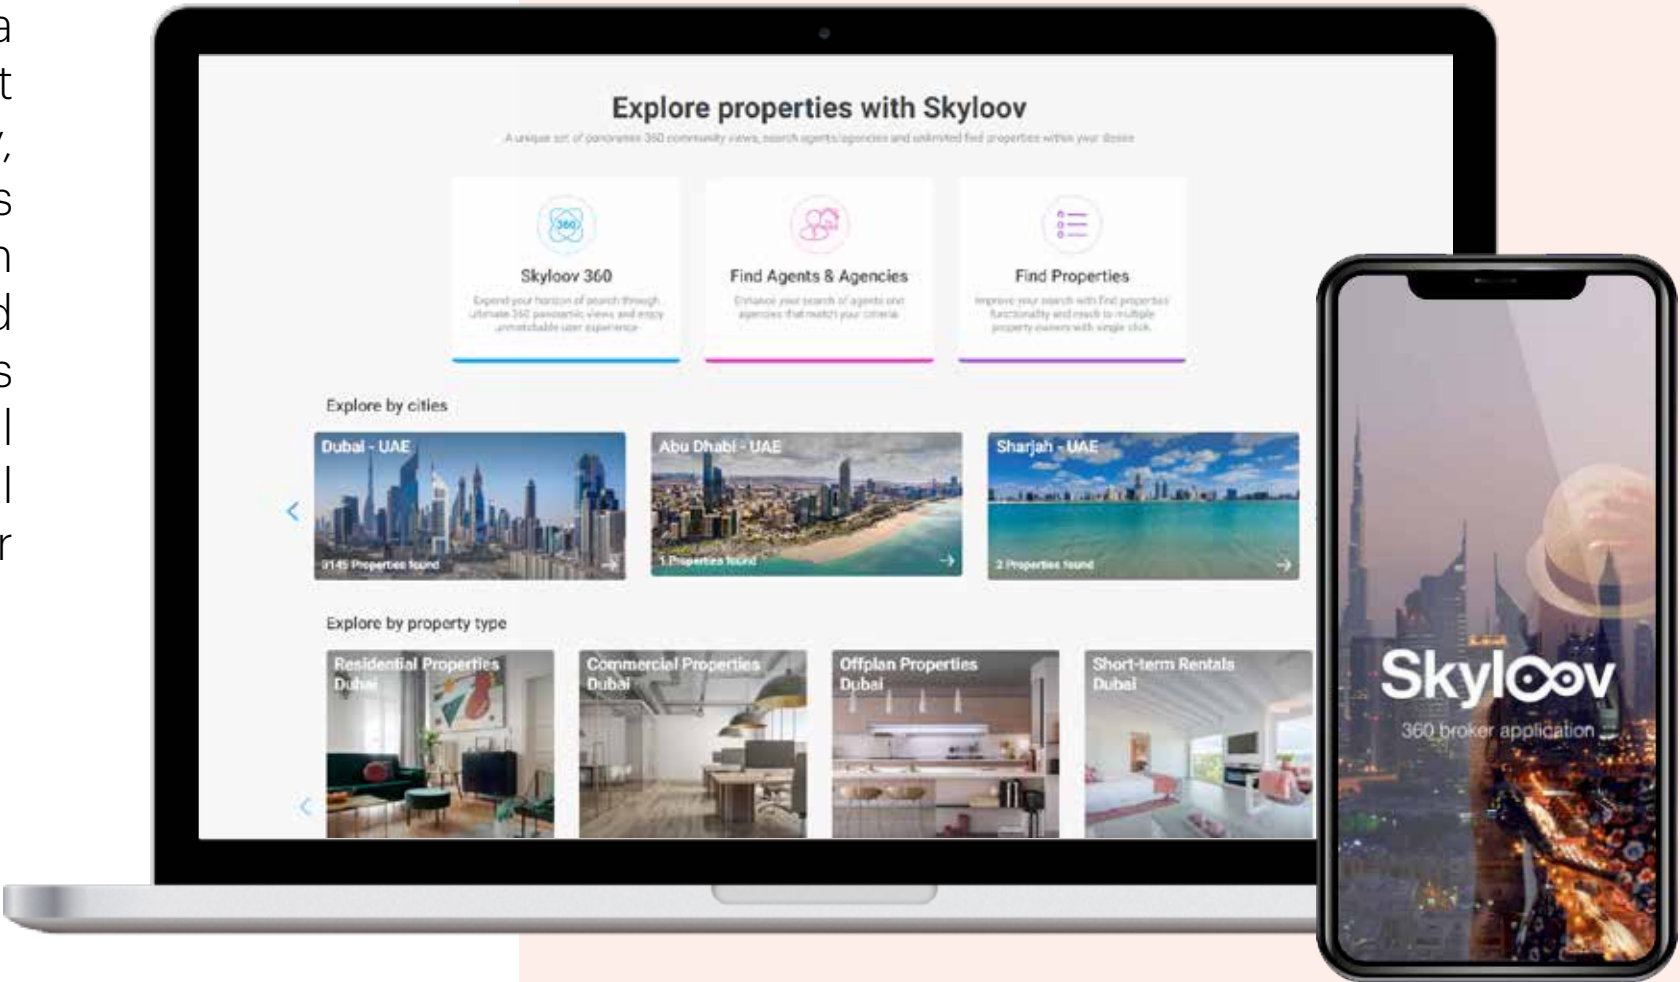

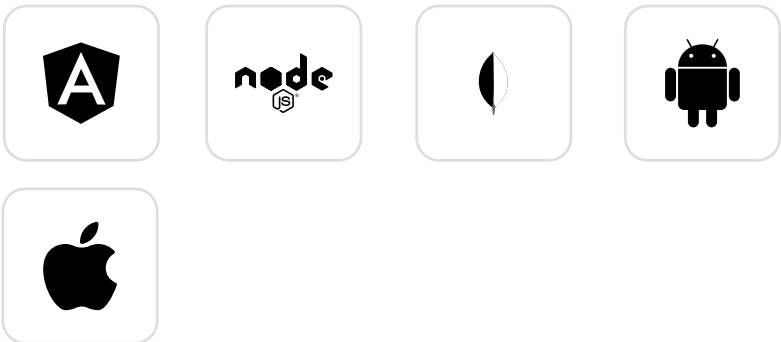

**Industry**  
Property and  
Real Estate

**Platform**  
Web App  
Mobile App

Skyloov is an innovative platform that provides a powerful search function for users to find properties. It offers detailed information about each property, including photos and key features, as well as panoramic 360 community views. Users can search for agents, agencies, and properties in their desired area, and can contact potential buyers or agents through a contact form, phone number, or email address. Skyloov makes it easy to connect with real estate agents, brokers, or buyers to discuss further details.

## Technology

# Argotime

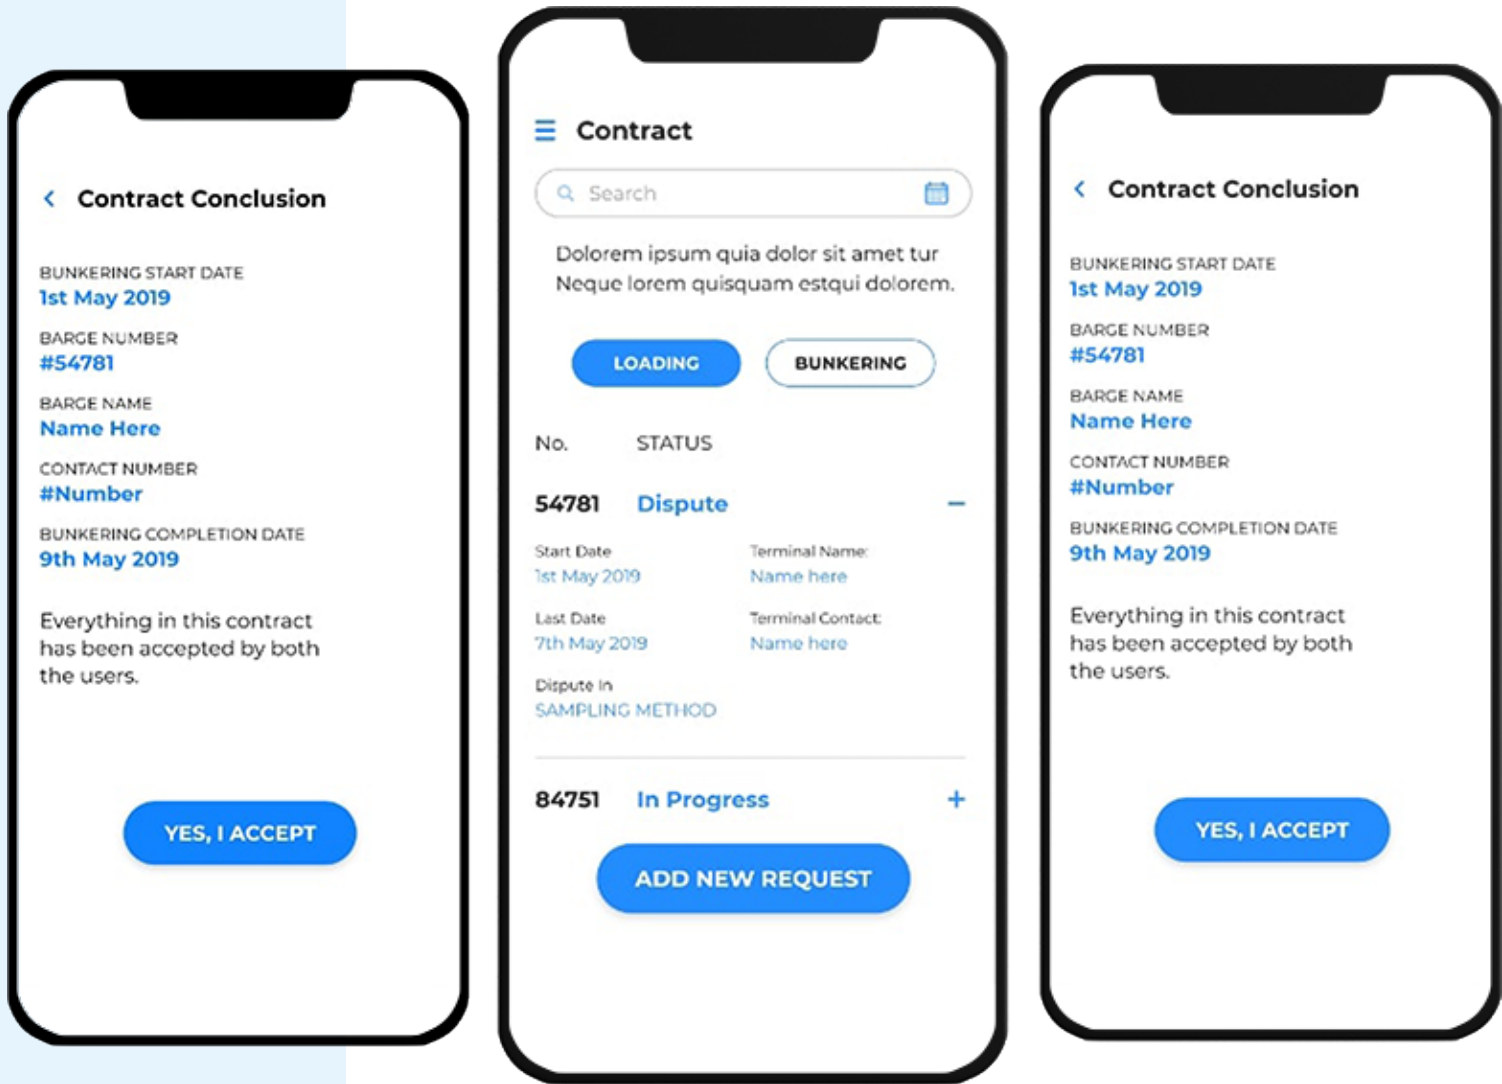

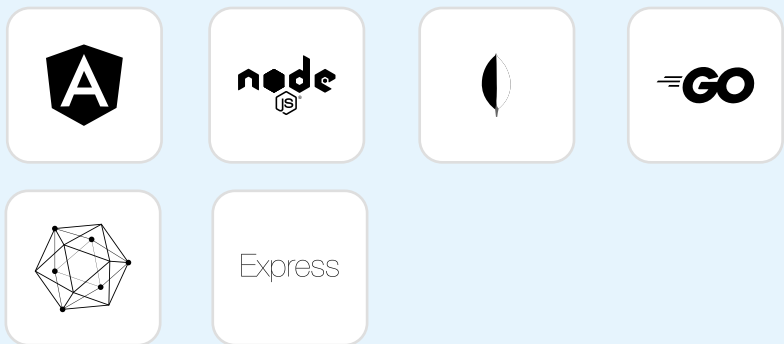

Industry  
Maritime

Platform  
Mobile App

Maritime is a blockchain based application that works on the shipment system. The main objective of the application is to streamline end-to-end services, from Terminal to Barge and Vessel using blockchain as a connecting platform. It monitors the loading and bunkering process.

## Technology

# Donutswap

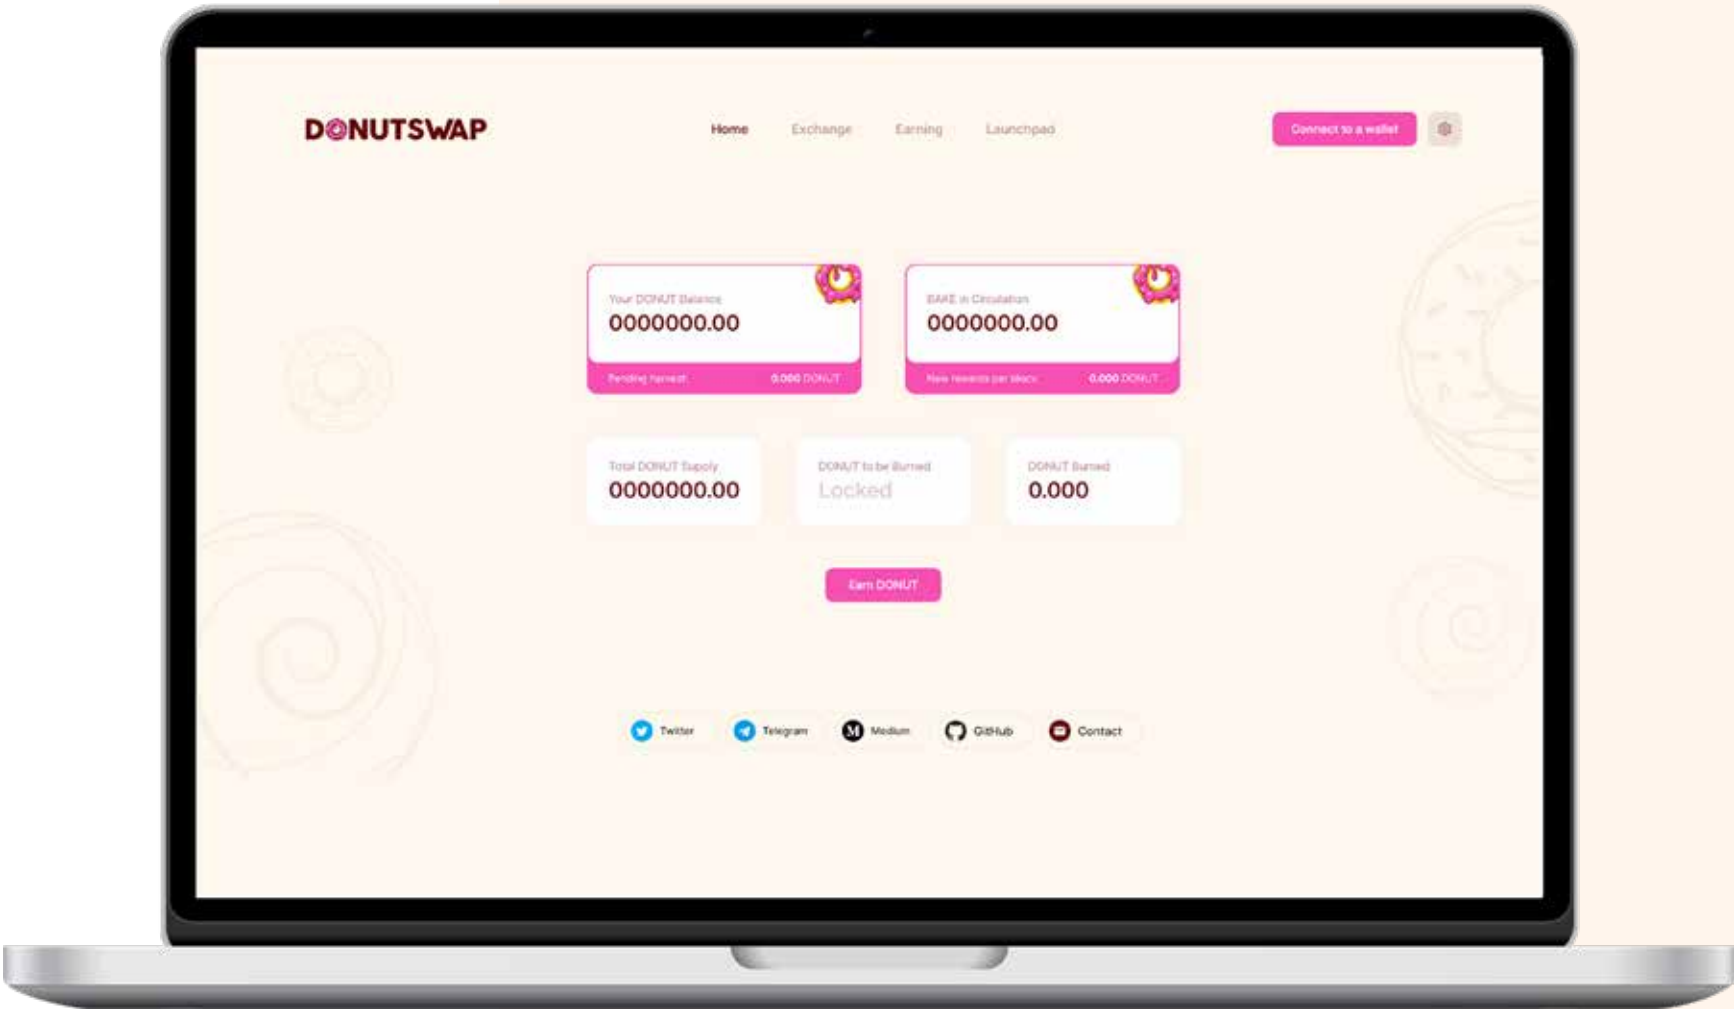

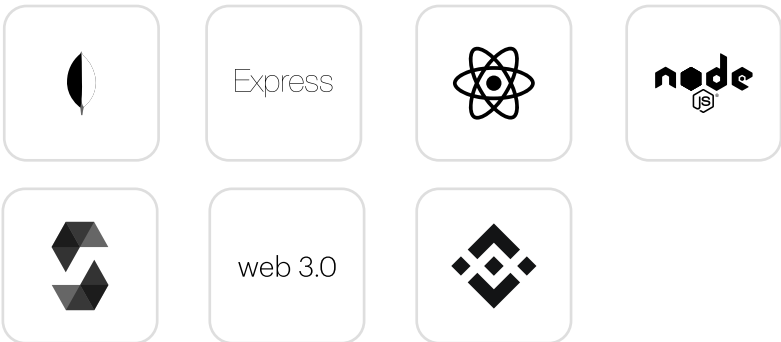

Industry  
DeFi

Platform  
Web App

A bespoke solution on Binance Smart Chain that provides the user multiple functionalities including swap, exchange, liquidity pools and IDO launchpad.

## Technology

# Tawuniya

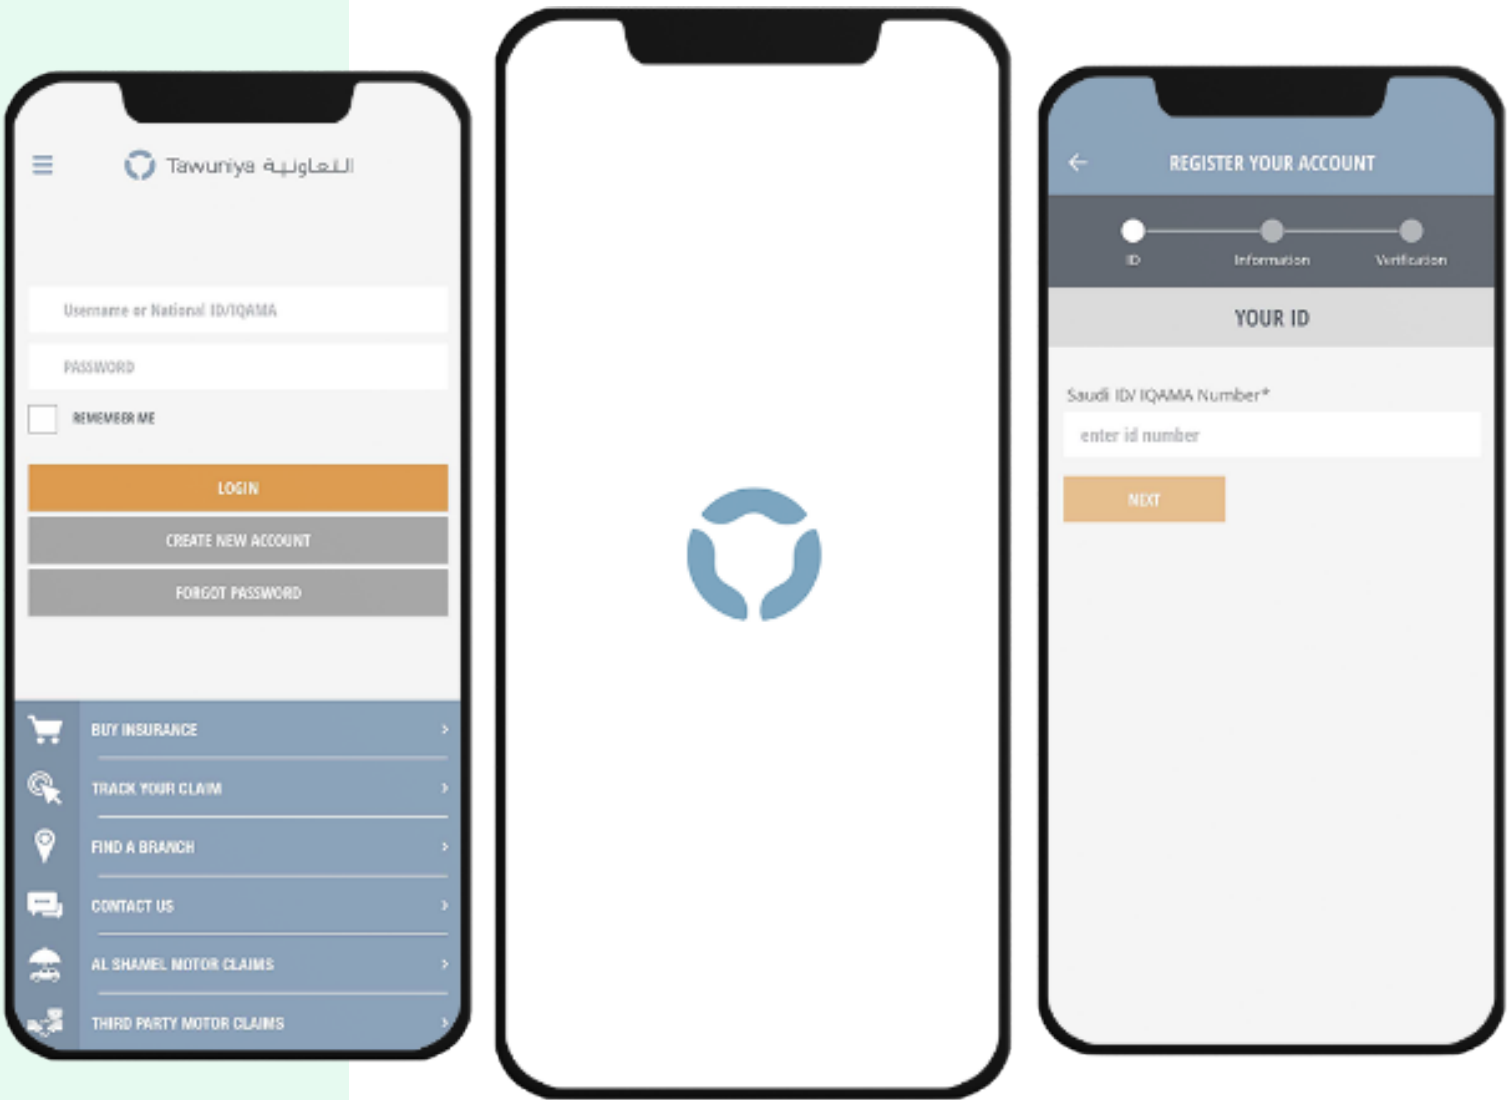

Tawuniya is an app that allows users to purchase or renew their vehicle and medical/health policies. With just a few clicks, users can easily compare policies, customize their coverage, and purchase additional insurance products. The app also provides a secure payment system, detailed information about the policies, and a notification center to inform users of any changes in the policy. In addition, users can access a wide range of features, making the app an ideal choice for individuals looking for comprehensive insurance policies.

## Technology

**Industry**  
Health and  
Vehicle Insurance

**Platform**

# Regalos Publicitarios

Industry  
E-Commerce

Platform  
Web App

Regalos Publicitarios website provides an easy and convenient way for users to explore and customize various merchandise items from different categories. Customers can order in a range of bulk quantities (from 1-100, 101-500, 501-1000, and more), and their prices will vary accordingly. Additionally, customers can order samples and ask for a budget, and can even upload artwork for customization. Furthermore, customers can keep track of their order's progress and have their customized merchandising delivered straight to their doorstep. Regalos Publicitarios offers a professional, efficient solution for all custom merchandise needs.

## Technology

# LaundroKart

Industry  
Laundry

Platform  
Web App  
Mobile App

LaundroKart has features to simplify and streamline laundry management. Administrators can manage pricing, pickup time slots, holidays, service areas, orders, and staff. Users can schedule pickups through the website or mobile app, specifying the date and time for pickup and delivery and selecting wash types. Notifications are provided for order status and payment can be made online or in cash. Delivery staff can use app to receive directions to the pickup location and update orders, while managers can accept and update orders and assign staff as needed. LaundroKart has over 100,000 users and 50,000+ downloads.

## Technology

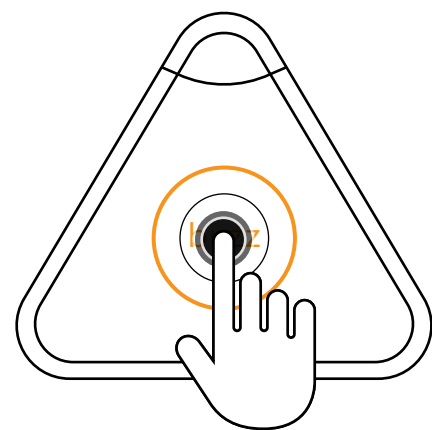

# OUR PRODUCTS

We're a team of creative minds who strive for excellence in everything we do. We utilize our full potential to find the perfect balance between our vision and capabilities.

# Buzz

Buzz is a smart widget that acts as an intelligent personal assist for everyday use. It's compact and convenient design makes it easy to attach it to any object. Built with versatility in mind, Buzz connects to your smartphone and strikes a perfect balance making it very reliable. Buzz will delight everyone at what it does.

# CLIENT TESTIMONIAL

What they say about WDCS

“

## Joshua Tobkin

Co-Founder & CEO

The proof of concept that Codezeros developed was well-received. Their expert team inspires confidence throughout the project by communicating clearly from the start. Their responsiveness and ability to turn constructive feedback into implementable, on-time deliverables are hallmarks of their work.

”

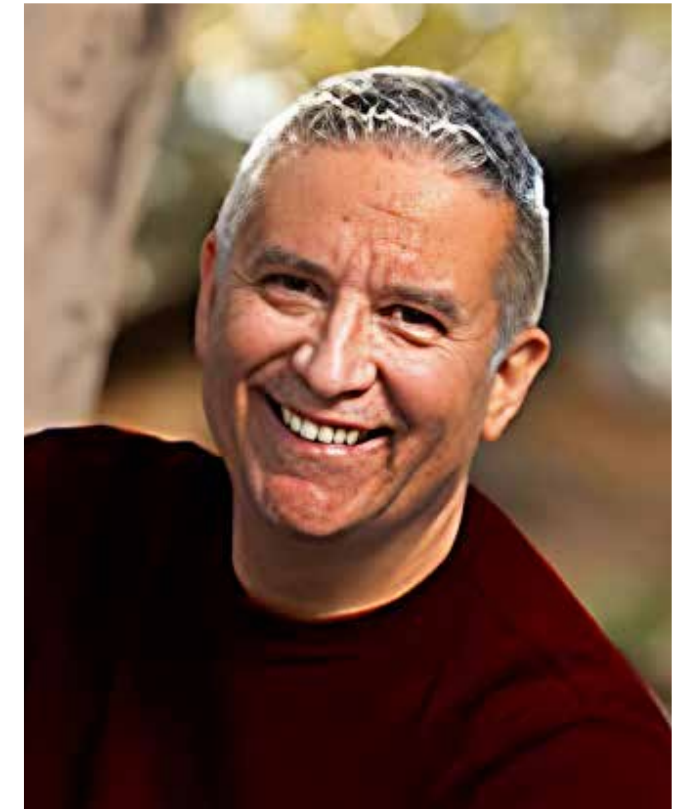

[www.wdcstechnology.com](http://www.wdcstechnology.com)

“

## Shaz

Founder & CEO

WebClues have hardworking and innovative people. The CRM enabled an agile work environment that kept costs to a minimum. The team had a systematic approach to development that kept workloads manageable. Strong communication skills set clear expectations for milestones.

”

Corporate Portfolio | 56

“

# Michael

CEO

We were very pleased with their ability to turn our idea into a reality. They have got aces designers and developers who can boost customer engagement and bring on board new revenue channels.

”

[www.wdcstechnology.com](http://www.wdcstechnology.com)

“

# Rodrigo Boabaid

CEO

The most impressive thing about the company is that they treated our project like their own. “Codezeros” efforts were met with positive acclaim across the board. The team is proactive, knowledgeable, and has excellent project management acumen.

”
